

Our Vision

We open the call to look for concrete examples in which R&I projects' results have been further developed and have been deployed as commercial solutions, have generated a new market or have contributed to new policies or regulations. The first call focuses on coordination & collaboration cases.

We want to promote implementation cases in order to inspire others to follow successful examples. We also want to understand enabling factors to lead such success.

We are studying 19 projects from FP5, FP7 and HORIZON 2020 to analyse their impacts. If you have used outcomes of those projects or any other regional, national or European R&I project beyond our lists, please let us know. If you know any projects that have led successful implementation cases, please reach out as well.

We will form a selection committee to look into all collected cases and present the first ALICE Logistics Innovation Award to recognise the achievement in a dedicated event in September 2021.

Call for Submission: Implementation Cases on Logistics Coordination & Collaboration

First ALICE Logistics Innovation Award

Get Involved:

Submission open: 11 May 2021

Submission deadline: 30 June 2021

To: info@etp-alice.eu

More information: etp-logistics/boostlog

Activities performed is
part of

BOOSTLOG

Received funding from European
Union's Horizon 2020 research
and innovation Programme under
grant No 101006902

We are studying 18 projects funded by FP5, FP7 & HORIZON2020. If you have used outcomes of the projects or we miss some projects whose projects have been implemented, please let us know!

Coordination & Collaboration

Coordination and collaboration refer respectively to vertical and horizontal synergies along and across different supply chains. In this context, Supply Network Coordination deals with the synchronization and dynamic update of logistics and transport plans, across modes and actors. Supply Network Collaboration deals with maximising resources utilization by matching demand from multiple shippers with available transport and logistics services from different modes and service providers.

Both Coordination and Collaboration can produce significant gains in terms of both efficiency and sustainability, leading the transition from individually managed supply chains to open supply networks.

Implementation Cases

Implementation Cases are concrete examples in which causal links between public R&I funding and technology, organizational or process innovation in a specific logistics area can be established.

Implement Cases are that research results have been further developed and have been deployed as commercial solutions, have generated a new market or have contributed to new policies and will establish causal links between research funding and impact.
