Log!Ville: open experience center fostering innovation

Digital experience center

- Visualized and personalized experience of future logistics 2030 - 2050
- Visitors will be inspired to interactively discover new innovative futures

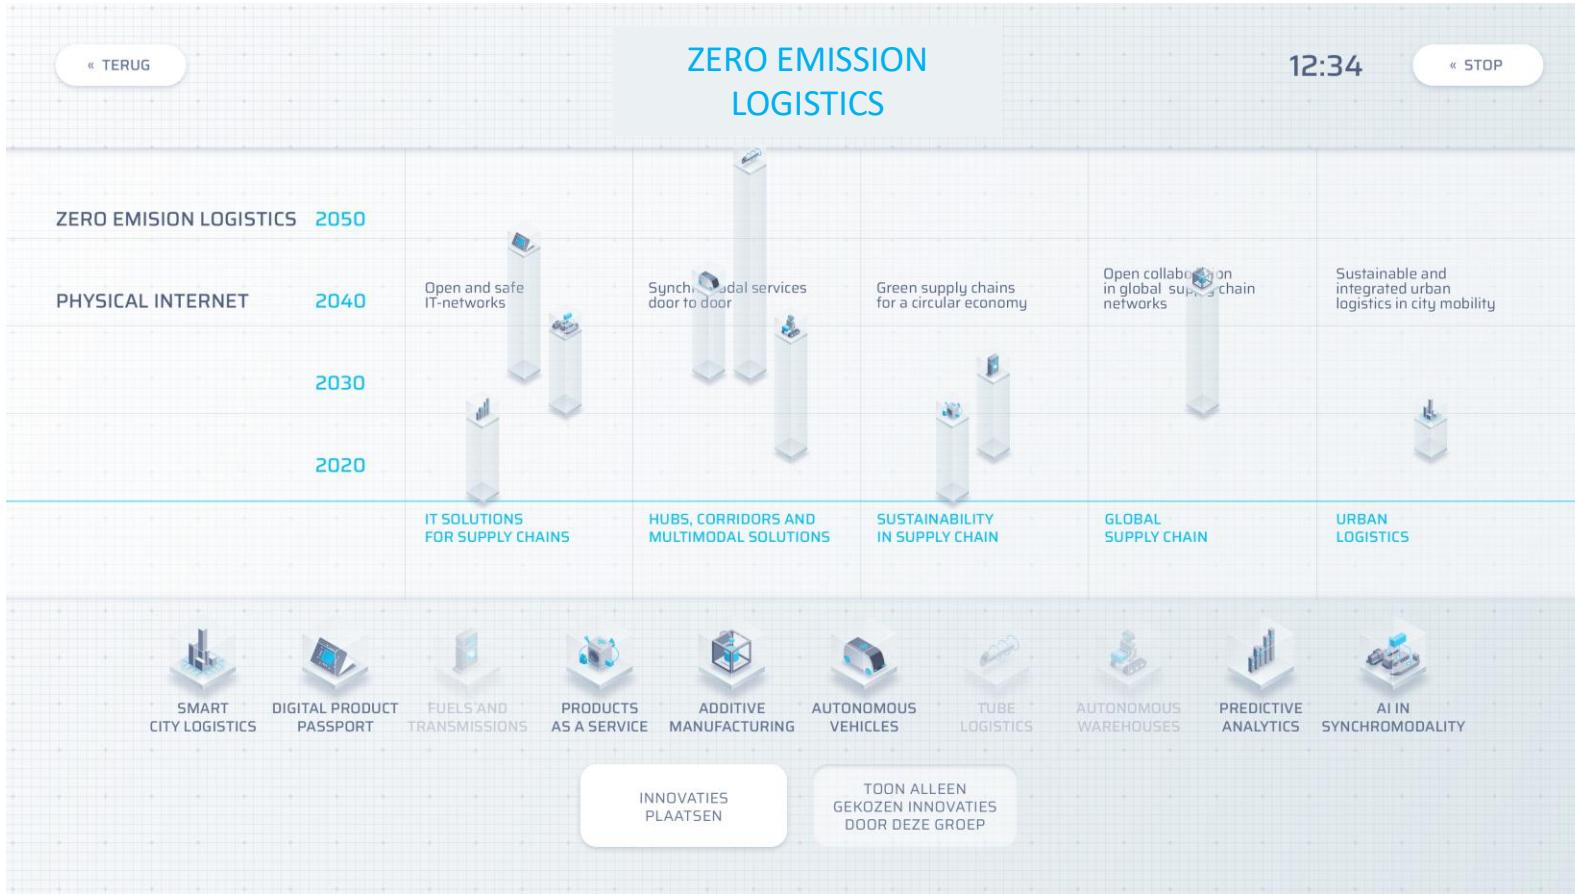

Physical demonstration center

- The physical demonstration center is a logistics playground for companies to test and discover new innovations in logistics
- Visitors will be guided by an innovation ambassador to receive qualitative information.
- Partners will demonstrate progressive applications from their innovation booth

From threat to PI solution

- Threats & challenges
- Interactively explore solutions
- Introduce vision of PI
- Discuss personal experience with envisioned maturity and mainstream tracks vis-à-vis PI roadmap
- Collaboration in dissemination with POM West-Vlaanderen
