

ALICE Thematic Group Efficient and Low Emissions Assets and Energy (ALICE TG1)

Fernando Liesa

**ALICE Secretary General &
TG1 Programme Coordinator**

Lóri Tavasszy

What does FIT for 55 mean for the freight and Logistics Sector?

Dr. Louise De Tremerie
Policy Advisor of Member of the European Parliament Van Brempt

November 4th 14.30 to 16:00 (CET)

Position paper on FIT for 55

Accelerating freight transport and logistics decarbonization

Green Deal

09/12/2019

- Growth strategy and ambition towards a climate neutral Europe by 2050

Sustainable and Smart Mobility Strategy

09/12/2020

Climate Law

30/06/2021

- Legal obligation of at least **55% reduction in GHG emissions by 2030** (compared to the 1990 levels)
- Legal obligation of **climate neutrality by 2050**
- Across Member States & sectors

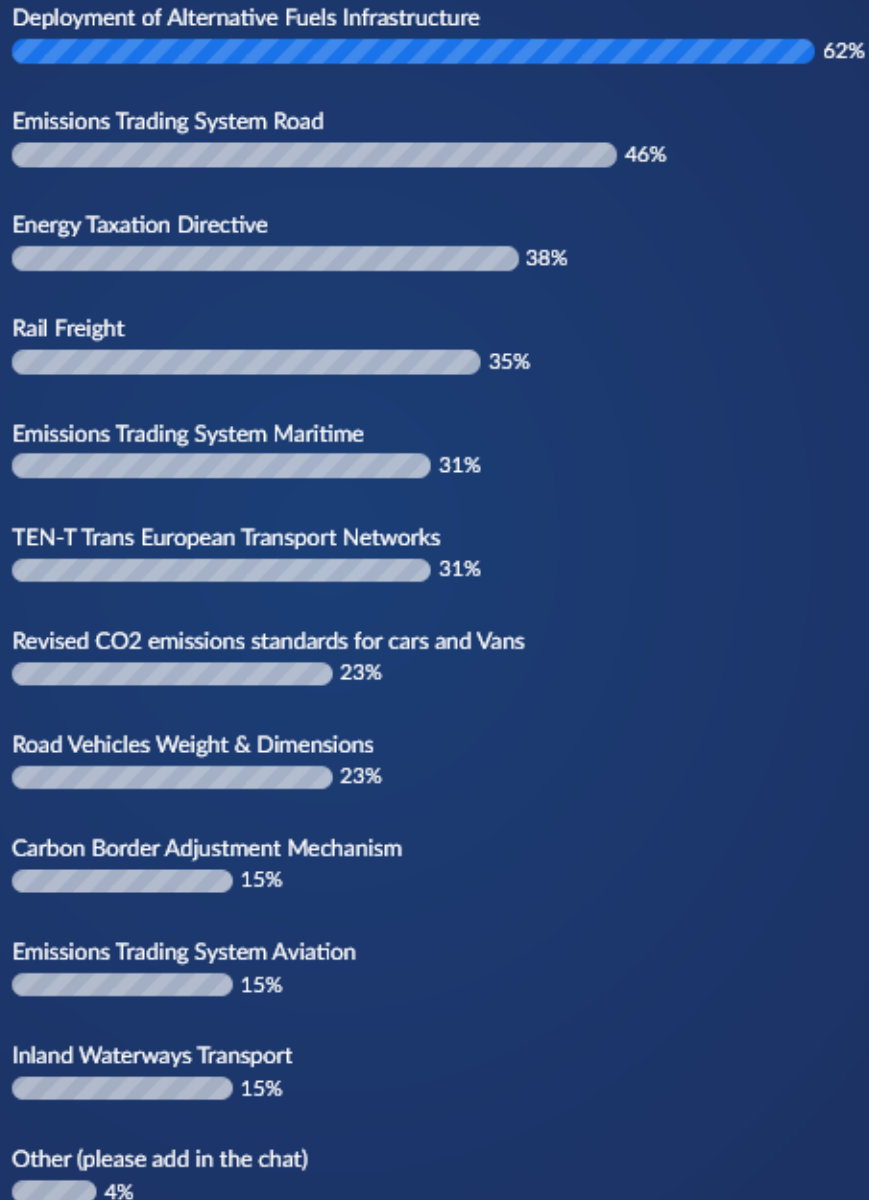

Fit For 55 Package

14/07/2021

- Delivering on the Green Deal: cost efficiency & fairness
- 13 interconnected legislative proposals covering **climate, energy & fuels**, land use and forestry, **transport**, buildings & social funding to reach a net reduction in GHG emissions of at least 55% by 2030

Efficient and Green Mobility Package

14/12/2021

Do you think these measures will actually promote:

Transitioning assets, fuels and energy carriers to lower emissions ones (e-fuels, Batteries, Green Hydrogen)

Increased efficiency operations vehicles and assets used to the max

Using other transport modes (i.e. rail or Inland Waterways Transport)

None of them

Achieving the transition for assets, energy sources, infrastructures, vehicles, and vessels is possible by 2040-2050 but we need short term success for 2030 ambitions

A holistic and integrated innovation approach addressing the vehicles, the energy, the infrastructure and operations

Affordable alternatives to fossil fuel are required and market adoption accelerated by using taxation revenues for market incentives

Carbon measurement and reporting is key

Rail and inland waterways need to truly become part of the solution

- **Starting dialogue with MEPs and regular exchanges with the EC (DG MOVE, DG CLIMA and DG R&I)**
- **Dialogue with Member States in our Mirror Group + Electro Mobility Europe collaboration**
- **Share with our members advances on running and future relevant files:**
 - Alternative Fuels Infrastructure
 - Emissions Trading System (Road)
 - CO2 emissions standards LDV and HDVs
 - Weight & Dimensions
 - TEN-T regulation
 - EU framework for harmonised measurement of transport and logistics emissions
- **Build synergies with sectorial associations such as CLECAT, ESC, FEPORT, IWT, ... that are deeply involved in the regulatory process.**
- **Seek for further support from companies willing to join forces with ALICE**

A lot of things already happening and many more to come so better to stay together and be ready for them 😊

What does FIT for 55 mean for the freight and Logistics Sector?

On the 14th of July 2021 the **Communication: fit for 55 delivering EU's 2030 climate targets** was published by the European Commission including a comprehensive set of proposals to make the **EU's climate, energy, land use, transport and taxation policies fit for reducing net greenhouse gas emissions by at least 55% by 2030**, compared to 1990 levels (**Fit for 55 press release**). These proposals will have important implications for freight transport and logistics and therefore we need to take full consideration of them in view of our Roadmaps implementation.

As part of ALICE *Efficient and Low Emissions Assets and Energy Thematic Group*, we are developing an activity to:

- Get updated on the developments within this package and understand members priorities and interests.
- Provide a framework for exchange between ALICE members, the European Parliament Members, the European Commission, Member States and Sectorial Associations to discuss on the initiatives development and provide feedback.
- Develop position papers and shared views.
- Defining joint actions to communicate and create dialogue points with relevant stakeholders.

Previous activities:

- **ALICE position paper on the on the "FIT FOR 55" climate package.**
- ALICE members workshop: ALICE position paper towards Members of the European Parliament. December 20th 2021.
