

## TG1 touching points with ALICE members in Q1-Q2 2022

Jan	Feb	March	April	May	Jun	July	Q3
		◇ 10/03 TG1 introduction and overview webinar					
2 zero							
		2ZERO Call HDV BE and FCEV call deadline	◇				
Hydrogen Europe							
		Large scale demonstration of European H2 Heavy Duty Vehicle along the TEN-T Corridors Call deadline	◇		◇	Webinar on availability vehicles - retrofitting	
Carbon Footprint measurement and reporting							
			◇ 21/04 Webinar: state of play			◇ Webinar emission factors for fuels	
Low emission assets availability							
◇	19/01 webinar on electrification (<16 ton)					◇ Webinar on electrification (>16 ton)	
				◇ Webinar on HVO & Bio-fuels			
Creating roadmap through surveys and member interaction at webinars							
Fit for 55							
		◇ 17/02 Position paper release					
Promoting the position paper

### Efficient and Low Emissions Assets and Energy

ALICE released end of 2019 the *"Roadmap Towards Zero Emissions Logistics in 2050"* as part of the renewed ALICE strategy and under the leadership of Sustainable Logistics Supply Chains Thematic Group.

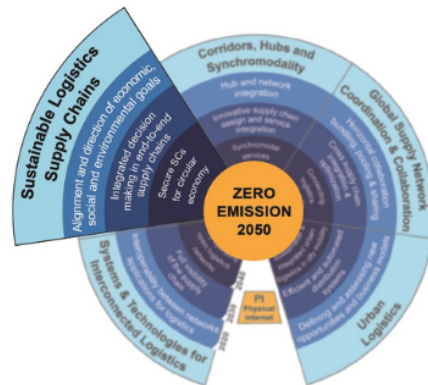

The figure below includes different solutions areas for supply chain decarbonization. ALICE is working on realizing these efficiency gains through the sister thematic groups on, *Corridors, Hubs and Synchronodality, Global Supply Network Coordination and Collaboration* and *Urban logistics*.

The current focus for this Thematic Group is currently on *fleets and assets are energy efficient and use the lowest emissions energy source feasible* through the following programmes:

What does FIT for 55 mean for the freight and Logistics Sector?

Horizon Europe Partnership: Towards zero emission road transport (2Zero)

Memorandum of Understanding and Collaboration with Hydrogen Europe

ALICE sustainable Logistics Supply Chains Roadmap
