	<p style="text-align: center;">François-Régis le Tourneau Vice President Corporate Responsibility - L'Oréal For the Future</p>	<p style="text-align: center;">L'ORÉAL</p>	<p style="text-align: center;">www.loreal.com</p>
<p>François-Régis Le Tourneau is of French and German nationality. He has a strong track record in executive positions in Controlling & Finance as well as Supply Chain Management. During the last 29 years at L'Oréal, François-Régis has managed organizational and transformational projects on selective and consumer channels with impacts on large teams. His leadership role is always to anticipate, innovate and obtain results in complex organizations.</p> <p>He is now in charge of the international coordination of the Sustainability Program "L'Oréal For The Future". François-Régis manages a world-wide Sustainability Leaders community in order to ensure, with the General Managers of each country, that sustainability is at the heart of the business transformation. <i>L'Oréal For The Future</i> aims at transforming L'Oréal's activities to respect planetary boundaries (climate, water, resources), at empowering the company's ecosystems and at contributing to solving the challenges of the world.</p> <p>Francois Regis is the Chairman of ALICE, Alliance for Logistics Innovation through Collaboration in Europe, member of the board of France Supply Chain, and advisory at the BunderVereinigungLogistik (the German Logistic Association).</p>		<p>For more than a century, we have devoted our energy and our competencies solely to one business: beauty. It is a business rich in meaning, as it enables all individuals to express their personalities, gain self-confidence and open up to others.</p> <p>Beauty is a language. L'Oréal has set itself the mission of offering all women and men worldwide the best of cosmetics innovation in terms of quality, efficacy and safety. By meeting the infinite diversity of beauty needs and desires all over the world.</p> <p>Beauty is universal. Since its creation by a researcher, the group has been pushing back the frontiers of knowledge. Its unique Research arm enables it to continually explore new territories and invent the products of the future, while drawing inspiration from beauty rituals the world over.</p> <p>Beauty is a science. Providing access to products that enhance well-being, mobilizing its innovative strength to preserve the beauty of the planet and supporting local communities. These are exacting challenges, which are a source of inspiration and creativity for L'Oréal.</p> <p>Beauty is a commitment. By drawing on the diversity of its teams, and the richness and the complementarity of its brand portfolio, L'Oréal has made the universalization of beauty its project for the years to come.</p> <p><i>L'Oréal, offering beauty for all.</i></p>	

	<p style="text-align: center;">Sergio Barbarino Research Fellow Supply Network Innovation Center</p>		<p style="text-align: center;">www.pg.com</p>
<p>Sergio Barbarino is a Research Fellow of Procter & Gamble Research & Development organization and currently Vice Chair of ALICE. Born in Naples, Italy, Sergio has a master's degree in chemical engineering from the University of Napoli Federico II and an MBA from the Solvay Business School in Brussels and is a Fellow Member of the Royal Society of Chemistry.</p> <p>In 2007, Sergio created the first group of Logistic R&D within Procter & Gamble, called Supply Network Innovation Center, of which he has been the Scientific coordinator. He has been leading the logistic chapter in the informal Industrial Advisory Board of the European Green Car Initiative and EIRAC, the Intermodal Advisory Council, now folded into ALICE (see above) of which Sergio is today the Chairman and for which he has been leading the Collaboration and Coordination Workgroup since the inception. Sergio has been the scientific leader of 2 EU FP7 projects: the C03 consortium aiming at increasing shipper collaboration on Logistics in Europe and Modulushca, aimed at the development of new shareable and reusable logistic standard modules for the last mile delivery.</p> <p>Today he is a senior leader of the P&G Open innovation initiative in Europe, the organization in charge of collaborative research, academic network and innovation partnerships. He has been Visiting professor - among others- at the Ecole des Mines de Paris, Georgiatech, Purdue, the City University of London, Solvay Brussels School, ZLC Zaragoza, Senghor (Egypt).</p> <p>Sergio is the proud co-owner of Onlygreatwines an Italian Wine Import business in Belgium featuring as flagship outlet Winehouse Osteria, high ranking Wine restaurant in Bruxelles.</p> <p>Sergio has also a long history of LBGT rights activism: he has been a founding member of DIGAYPROJECT in Rome in 2000, of the BBA in Belgium in 2003 and the GABLE Group at Procter & Gamble in Brussels in 2014.</p>		<p>Three billion times a day, P&G brands touch the lives of people around the world. The company has one of the strongest portfolios of trusted, quality, leadership brands, including:</p> <p>Pampers®, Tide®, Ariel®, Always®, Whisper®, Pantene®, Mach3®, Bounty®, Dawn®, Gain®, Charmin®, Downy®, Lenor®, Crest®, Oral-B®, Head & Shoulders®, Gillette®, and Braun®</p>	

	<p>Nik Delmeire Coordinator</p>		<p>www.inlandwaterwaytransport.eu</p>
<p>Belgian, obtained the degree of MBA at the University of Leuven in 1982. From 1983 till 2014 he had several management functions in Purchasing and Supply Chain in AGFA-GEVAERT, a Belgian multinational active in the world of Imaging.</p> <p>Through his role in AGFA's Supply Chain he got involved in the Belgian Shippers' Organisation called OTM. An organization he chairs from 2009 till 2015. He was Vice Chairman of ESC from 2011 till October 2014. In October 2014, he joined ESC as Secretary General until February 2019 when he took the position of coordinator of the European Inland Waterways Platform.</p>		<p>As an extension of EBU and ESO, IWT aims at a stronger positioning of Inland Navigation in European and National Transport Policies by an intensified contribution to various governing bodies, working parties and standard setting committees. At the same time IWT will encourage innovation with respect to the fleet's technical progress leading to even more environmentally friendly vessels. Facilitating access to financial instruments of all kinds should bring leverage to this progress. Last but not least Inland Navigation should become more respected and better integrated in Europe's Transport System and should be at the forefront when it comes to preparing this system for 2030 and beyond. Making IWT more effective and efficient with the help of disruptive innovation and digitalisation in general will be key in this evolution.</p>	

	<p style="text-align: center;">Pieter Leonard Capability Manager Supply chain food – transport</p>		<p style="text-align: right;">http://www.colruytgroup.com</p>
<p>In 2009 I Joined the supply chain department of Colruyt Group. I Started as Project manager within the e-commerce warehouse (Collishop). I gained a strong understanding of operational Supply chain process. In 2011 I transferred towards the Supply chain direction of the Group and became a strategic Project manager working on different strategic themes: evolving from departmental towards process minded organization, implementing risk management procedures, increasing resilience of the supply chain... In 2017 I Joined LINEAS. Working as a project manager in Rail freight transport, with a focus on digitalizing the job of Train drivers (LINEAS) In 2018 I Re-joined the Supply Chain department of Colruyt Group as a capability manager for the domain, with a focus on Transport. Since then I've worked on the long term vision of transport for the Colruyt Group, with a strong focus on reducing the impact of our supply chain. In 2019 I Joined Alice as a Vice chair in the thematic group "Sustainable Logistics Supply Chains"</p>		<p>In a time span of over half a century Colruyt Group has grown from a family company into a family of companies with almost 30.000 employees. For a long time, we were known mainly for the Colruyt discount store, but in recent decades we have greatly diversified our activities. DATS 24, OKay, Bio-Planet, Dreambaby, Spar, Eoly, Cru ... After an often modest start, these brands have now grown into fully-fledged companies with their own identity. No matter how different, with every new initiative we want to provide meaningful added value. In line with the changing spirit of the times and the needs of consumers, at all stages of their lives. All Colruyt Group businesses share a common identity and culture. This is summed up in our mission and inspired by our nine historic values: respect, togetherness, simplicity, readiness to serve, faith, hope, space, courage and strength. We aim for sustainable economic growth along with a strong commitment to human and social development. In the long term too. Sustainability has run through all of our activities as a common thread. Our ambitions are far-reaching. We want to be a reference point for sustainable entrepreneurship in Belgium. We put many people and resources into this. We are proud of what we have achieved over the years, while realising that sustainable entrepreneurship never ends. So, day after day, we do our best to make a meaningful difference together. Step by step</p>	

	<p style="text-align: center;">Salvador Furió</p> <p style="text-align: center;">Valenciaport Foundation</p> <p style="text-align: center;">Director of Innovation & Port Cluster Development</p>	 	<p style="text-align: center;">www.valenciaport.com/</p> <p style="text-align: center;">www.fundacion.valenciaport.com/</p>
<p>Salvador Furió holds a PhD in Industrial Engineering from the Polytechnic University of Valencia and a Master of Science in Port Management and Intermodal Transport from the University of Comillas (ICADE). After six years of experience as Project Director at LOGISTA, the main Spanish logistics operator, he joined the Valenciaport Foundation in 2004 as Director of Logistics and Intermodality. Since then, he has participated and directed numerous consulting, research and cooperation projects at national, European and international levels, always related to container logistics, maritime, railway and intermodal transport, trade facilitation, planning and design of logistics platforms or energy efficiency and environmental management. In 2019 he took on a new responsibility in the entity as Director of Innovation and Development of the Port Cluster, coordinating the areas of digital transformation, sustainability, port logistics, safety and security, port-city integration and market intelligence. In addition, he collaborates regularly giving classes in different master programs of the Universities of Valencia and Castellón, is director of the course of Single Window of Foreign Trade of the Inter-American Development Bank and participates in national and international congresses of transport and logistics.</p> <p>Valenciaport Foundation (VF) is the knowledge and innovation centre for the leading port cluster in the Mediterranean: Valenciaport. It is an initiative of the Port Authority of Valencia that brings together key companies in the port – maritime transport – logistics sector, as well as universities and institutions linked to the port community of Valenciaport.</p> <p>Since its creation, VF has developed 242 projects in more than sixty countries, mainly in the Mediterranean, the rest of Europe, Asia and Latin America.</p> <p>VF objectives are:</p> <ul style="list-style-type: none"> •Promoting innovation, by fostering the design, implementation and execution of R&D&I projects aimed at enhancing the competitiveness of companies and institutions in the sector. •Knowledge management, offering specialized and high value-added training for the continuous professional development of the port-logistics community's human capital. •Active cooperation policy with port communities around the world by providing technical assistance and support to Spanish logistics operators undergoing a process of internationalization. Internationally showcasing the Port of Valencia's know-how. •Market intelligence service to develop indexes, databases and reports of strategic interest to the sector. •Support for the port-logistics community, encouraging cooperation within the sector as well as outreach initiatives and dialogue with the general public, within the framework of a collective social responsibility strategy. <p>VF leads the Valenciaport Cluster Innovation Committee, bringing the opportunity to mobilise companies to deploy innovation-led transformation, whilst acting as an example for the European ports network and internationally. The companies VF collaborates with cover the entire transport chain, from the exporter, to the road haulier, railway service operators, freight forwarders and logistics operators, maritime agencies, terminals of different types, technical-nautical services, Customs, other government agencies and international institutions.</p>			

	<p>Dipl.-Ing. Lars Deiterding</p> <p>Executive Director HaCon</p> <p>Governing Board Member Shift2Rail</p> <p>Chairman UNIFE Freight Committee</p>		<p>www.hacon.de</p>
<p>Lars Deiterding is working for HaCon for 18 years, since 2007 he is head of the Freight Transport and Logistics department and working on projects related to railway and intermodal transport and innovations in multimodal freight transport. Since 2012 he is also Executive Director at HaCon and is additionally leading the international research activities of the various departments.</p> <p>In the role of project coordinator, manager and senior consultant he is responsible for several consultancy projects for clients such as combined transport operators, railway operators, infrastructure managers, the national Ministry of Transport and DG TREN of the European Commission. He has more than 20 years of experience in research and expert analysis activities in all areas of the international transport industry focusing on the following fields: Planning and design of railway systems, infrastructure assessment and timetable analysis, expert analyses for rail operations with several different analysing tools, determination of the efficiency of railway systems, consulting in the field of integrated transport chains and research and development of combined transport.</p> <p>Within the projects mentioned above he has gained a comprehensive overview of the International European rail freight market. He led and is leading the multiannual, multi-disciplinary projects TREND, CREAM, TIGER, TIGER-Demo, ViWaS and SPIDER PLUS in the last year and is the project manager of several running studies for Rail Freight Corridors and the European Commission. In the last years, the design and implementation of appropriate IT-systems for transport optimization got higher into his focus and as already for IP5 in Shift2Rail he is now involved in the preparation of the Flagship Area on Freight in the new Europeans Rail Joint Undertaking. Since the acquisition of Hacon as innovation driver in the mobility sector by Siemens Mobility, he is steering several Siemens activities for combining freight related solutions.</p>		<p>HaCon provides cutting-edge software solutions for public transportation, mobility and logistics.</p> <p>Our three business units, HAFAS, TPS and Consulting, provide more than 370 highly qualified specialists and more than 35 years of experience for your success.</p> <p>From trip planning to mobile ticketing and fleet management; our HAFAS product suite covers all aspects of Intelligent Transportation Systems and creates the ultimate end user experience.</p> <p>HaCon's TPS solutions for train planning and capacity management enable network providers and operators to make the most of their infrastructure.</p>	

	<p>Dr. Angelos Amditis</p>		<p>https://i-sense.iccs.gr</p>
<p>Research Director</p>			
<p>Dr. Angelos Amditis (PhD, MBA) is Research Director in the Institute of Communication and Computer Systems (ICCS), and member of its Board of Directors. Since 2002, he is the founder and the Director of the I-SENSE Research Group of ICCS that currently employs more than 100 researchers, technicians and administrative/support personnel.</p>		<p>The Institute of Communication and Computer Systems (ICCS) is a non-profit academic research body established in 1989 by the Greek Ministry of Education to carry out research and development activities in the areas of telecommunications, sensors and sensor networks, electromagnetic sensors, satellite and wireless communications, telematics and multimedia applications, transport applications, control systems, biomedical engineering and electric power (www.iccs.gr). It is closely associated with the School of Electrical and Computer Engineering of the National Technical University of Athens (NTUA) (est. 1837), which is the oldest and most prestigious academic institute in Greece. The personnel of ICCS consists of academic staff (~80 University Professors), 40 senior researchers and more than 500 researchers (including PhD students) in twenty research laboratories.</p>	
<p>He represents the Institute of Communication and Computer Systems (ICCS) in ERTICO - ITS Europe, where he is the Chairman of the Board of Directors. He is member of the Executive and Steering Group of ALICE (co-Chair of the TG3: Systems & Technologies for Interconnected Logistics). He is one of the initiators of the EuroVR Association where he served as President from September 2010 till March 2016. Currently he is the Vice President and member of the Executive Board. He was one of the founding members of ITS Hellas, serving as a President till 2016 and now serving as Vice President. He is the National Representative of Greece at EU on Co-operative Connected and Automated Transport and Mobility (C-ITS and CCAM). He is the Deputy Chairman of the Athens Urban Transport Organisation (OASA) and member of the Board of Directors of the Athens Water Supply and Sewerage Company (EYDAP S.A.). He is the Chairman of the Steering Committee of the Hellenic Port Community System (HPCS) of the Piraeus Container Terminal S.A. (PCT) and Member of the Innovation Platform of the Hellenic Corporation of Assets and Participations S.A. (HCAP). He is a Member of the Greek Delegation team of the "shadow" thematic subgroup for Climate, Energy and Mobility as part of the "Shadow" Strategic Committee (SPC) for the configuration of the new work programmes of Horizon Europe (2021-2024) and Member of the Working Group on Transport and Supply Chain of General Secretariat for Research and Technology (GSRT) Platform.</p>		<p>Within ICCS, the I-SENSE Research Group (http://isense.iccs.gr) is very active in areas dealing with vehicle automation, C-ITS, IoT applications for people and freight transport, smart mobility, supply chain management, innovative middleware/Platform as a Service (PaaS) solutions for many application domains (environment, logistics, structural health monitoring and security), embedded systems and sensor networks, next generation communication technologies and many more.</p>	
<p>Angelos is currently coordinating 13 EC-funded projects, i.e. the newly accepted projects EIFFEL, 5G-IANA and NIGHTINGALE and the ongoing projects Innovation cluster for protection and security against environmental hazards, echarge4drivers, INGENIOUS, HYPERION, CitySCAPE, IN-PREP, DIONE, Cyber-MAR, RESIST, and ICT4CART. He has also participated in more than 150 research projects during the last 20 years, including in the</p>		<p>The I-SENSE Research Group comprises more than 100 members (academics, post doctoral and post-graduate researchers and administrative staff). It has coordinated and participated in numerous research and development activities in the framework of European and national projects. Indicatively, the following projects are worth mentioning: in H2020, it is the coordinator of HYPERION, COREALIS, ELVITEN, IN-PREP, SAFERtec, PLUGGY, SCENT, NeMo, RESIST, ICT4CART; in FP7 and NTERREG, FABRIC (coordinator), INTE-TRANSIT (coordinator), SMARTPORT, VRHyperspace, GAME-ABLING, ManuVAR, AutoNet2030 coordinator), AdaptiVe, CityMobil2, TEAM, MOBiNET, INACHUS (coordinator), RECONASS (coordinator), ROBOSPECT (coordinator). More details can be found here: http://i-sense.iccs.gr</p>	
<p>EC-funded projects COREALIS, ELVITEN, PLUGGY, SCENT, NeMo, SAFERtec, AutoNet2030 and INTE-TRANSIT as a coordinator and the MOSES, BOOSTLOG, 5GLOGINNOV, FENIX, CAPITAL, CLUSTERS2.0, ASSURED, interACT, INFRAMIX, L3Pilot, CARTRE, ITS-Observatory, SMARTPORT, AdaptiVe, interactiVe, euroFOT, TELEFOT, PREVENT as a scientific responsible.</p>			
<p>His current research interests include automation in road transport, highly and fully automated driving, cooperative systems in transport, electromobility, vehicle to grid connectivity and charging optimization strategies, smart mobility for people and freight, simultaneous Localisation and Mapping in indoor and outdoor environments, PaaS/SaaS for logistics applications, computer vision and machine learning, data analytics, sensor and information fusion, IoT and Cyber Physical Systems, next generation communication technologies, ergonomics and human-machine interaction, Circular Economy, 5G technology.</p>		<p>ICCS is a member of ALICE since 2014 and in 2019 the Director of I-SENSE Group, Dr. Angelos Amditis became the co-Chair of the TG3: Systems & Technologies for Interconnected Logistics.</p>	
<p>He is participating or has participated to the CCAM, C-ITS Platform, 5G IA, PSCE, ILME, MaaS, INATBA, EGVIA, OCG, A.SPIRE, DTLF, GEAR2030, TM2.0 Platform (Steering Body member), Trilateral WG on Automation, euRobotics, SENSORIS, WsTP, UITP, AIOTI and many other EC Groups and Platforms. He is the writer of 100 peer reviewed journal articles and book chapters and more than 240 conference papers.</p>		<p>ICCS and the ALICE organisation have a strong history of successful collaborations under the following projects: COREALIS, MOSES, BOOSTLOG, 5GLOGINNOV, FENIX, CAPITAL, CLUSTERS2.0.</p>	

	<p>Michael Archer Strategy Development Director</p>	 A Brambles Company	<p>https://www.chep.com/au/en/why-chep</p>
<p>Michael has worked for CHEP for 30 years, many of those working with grocery retailers and manufacturers to optimise the share and re-use business model for reusable packaging, and extend the pallet pool from 6 European countries in 1990 to 28 today.</p> <p>In 1999-2001 he was an active member of the Profit Impact of ECR Taskforce for ECR Europe alongside leaders from major retailers and manufacturers.</p> <p>Today his focus within CHEP is on collaboration to identify opportunities to reduce transport, packaging and broader supply chain waste and to lead them through research, development, testing with a clear focus on maximising impact as successful initiatives are scaled up.</p>		<p>CHEP operates pools of standard reusable packaging assets across Europe. To Service this it delivers and collects empty packaging from c300,000 locations across Europe, working with all the grocery retailers and many of their suppliers every day. It is best known for its blue pallets, shared widely across Europe and beyond.</p> <p>As a leader in the Circular Economy, Brambles (CHEP's parent company) is recognised as one of the most sustainable companies in the World. Brambles launched their Zero Waste World initiative in 2019, committed to supporting customers and interested parties in step-change reductions in packaging, transport and process Waste.</p> <p>CHEP has initiated and scaled up a programme of collaborating with customers to minimise empty running, initially surrounding the shipping of empty pallets, and subsequently as an orchestrator of multiple customers collaborating to use the same vehicle for complementary lanes. CHEP is looking to use its experience, scale and visibility over its customers' transport lanes to support the focus on decarbonising logistics.</p>	

Charlotte MIGNE

Group sustainable development director

www.fmlogistic.com

Charlotte started her career in Sustainable Development within the Accor Group between 2004 and 2006. She then joined the consulting firm Capgemini Consulting where she carried out several organizational and strategic missions for major transport and energy companies.

In 2010, she joined the Edenred Group (formerly Accor Services), a global leader in prepaid service vouchers, as Corporate Social Responsibility Director and then, as from 2014, Corporate Social Responsibility and HR Director. During this period, she was in charge of the FOOD programme (Fighting Obesity through Offer and Demand), European consortium composed of private public partners, co-financed by the European Union.

Since 2017, she was appointed Group Sustainable Development Director at FM Logistic. Her mission is to define and animate ambitions, priorities and objectives regarding sustainability, answering the needs of different stakeholders. 3 main stakes are included in FM Logistic sustainable roadmap: people's working conditions, safety and personal development; environmental impacts of FM Logistic activities on the whole.

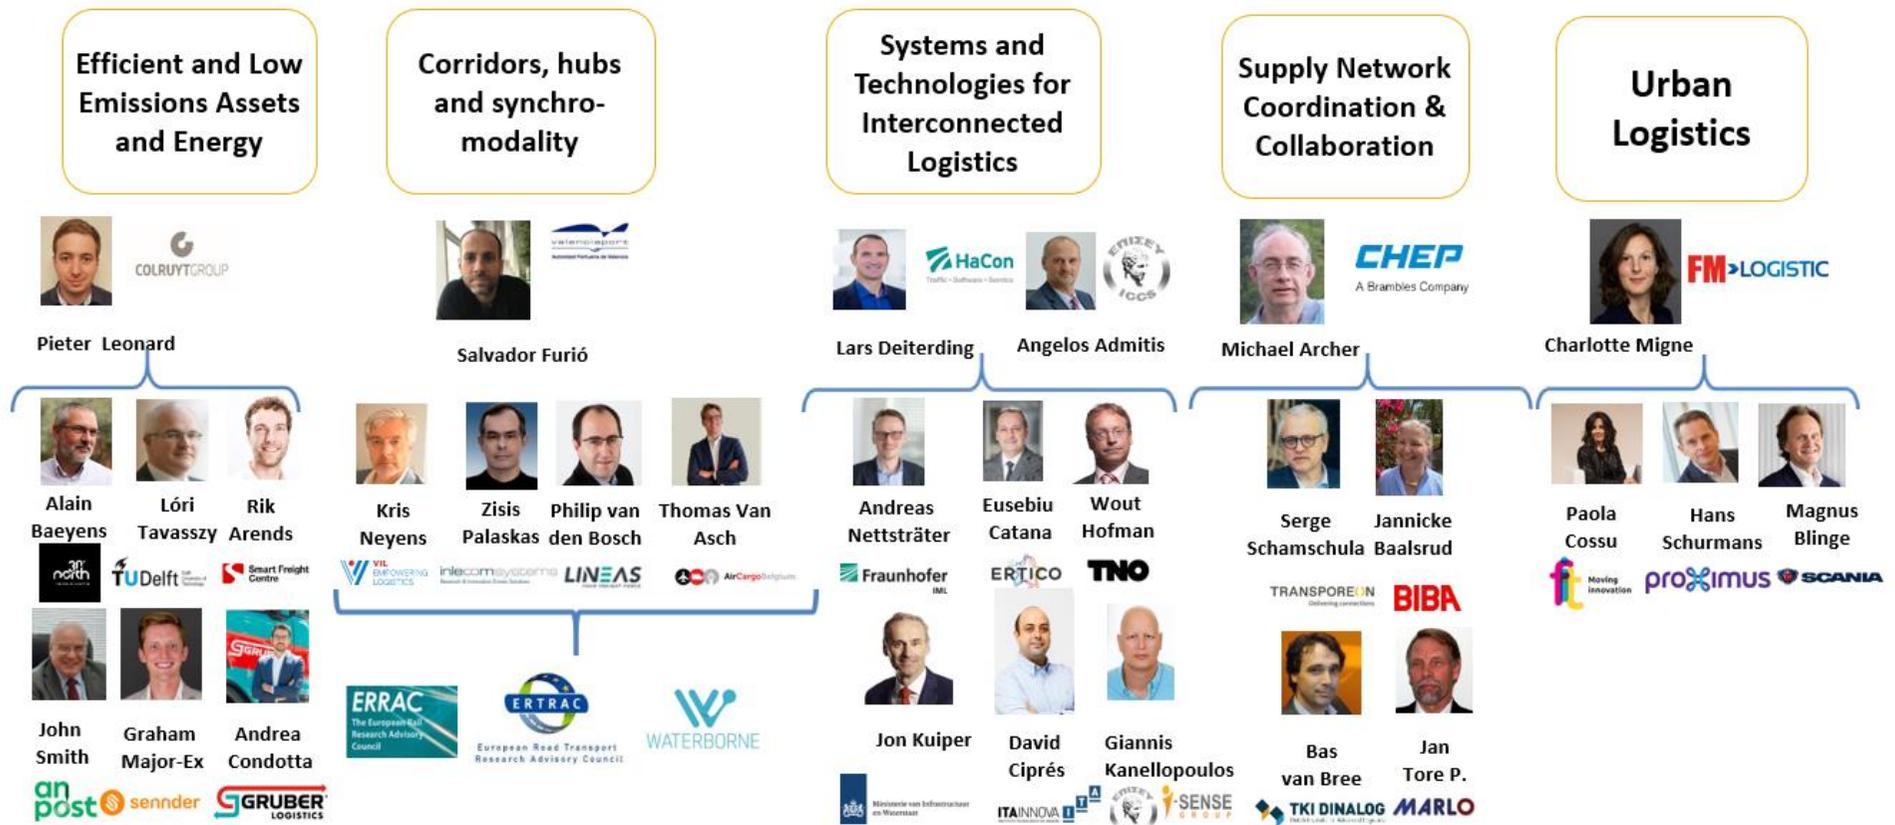

Founded in 1967, FM Logistic is a major global player in supply chain with expertise spanning warehousing, transport and co-packing. The independent, family-owned group is a leader in the FMCG, retail, perfume & beauty, manufacturing and health sectors.

With operations in 14 countries across 5 regions (Western Europe, Central Europe, Eastern Europe, Asia and Latin America), FM Logistic generates a turnover of more than €1.4 billion.

FM Logistic pioneers tomorrow's supply chain solutions. It is behind concepts such as pooling (joint management of transport and logistics resources) and collaborative routing centres (multi-customer, multi-supplier pooled flows). FM Logistic keeps its finger on the pulse as consumer habits change. It has developed Citylogin, a cost-effective last-mile logistics solution that is currently in use in cities such as Rome, Paris, Madrid and Moscow.

On June 29th, FM Logistic announces its vision for a sustainable and omnichannel supply chain and call for a global "Supply change" among the industry www.supplychange.com

ALICE Thematic Groups Chairs & Vicechairs

	<p>Pieter Leonard Capability Manager Supply chain food – transport</p>		<p>http://www.colruytgroup.com</p>
<p>In 2009 I Joined the supply chain department of Colruyt Group. I Started as Project manager within the e-commerce warehouse (Collishop). 	<p>Alain Baeyens Consultant</p>		<p>https://www.linkedin.com/company/30°north</p>
<p>Alain is an independent Supply Chain consultant with more than 25 years of experience. His focus is on Supply Chain optimization, change management and training. He is convinced that especially in this age of technology the human factor remains a key element for a successful supply chain.</p> <p>He is a chemical engineer by education but in 1992 he became a supply chain addict. He held positions in planning, project management, operations management, purchasing, compliance, training, and Supply chain management. He is active in Kuwait since 2017.</p> <p>In 2000 he did his first digital project he implemented Vendor-Managed Inventory (VMI) systems all over Europe. In 2001 he was part of the e-Supply Chain Solutions team of ELEMICA, the first exchange platform in the Chemical industry. Ever since he followed the evolutions in the Digital Supply Chain closely.</p> <p>He advocates collaborative sustainable solutions in logistics which can only be achieved in a digitized supply network and will eventually lead to the physical internet.</p> <p>He is a board member of OTM, the Belgian Shippers association, Director of ELUPEG (European Logistics Users, Providers and Enablers Group)</p>		<p>30° North, Supply Chain Advice World Wide.</p> <p>30° North, Supply Chain Advice World Wide. In touch with the latest developments, with more than 25 years of experience, we help you to overcome your Supply Chain Challenges. We provide Supply Chain Maturity assessments, TCO analysis, and Gap analysis. We define and support Supply Chain optimization, logistics, purchasing and outsourcing projects. We believe that people are the keystone in the Supply Chain and therefore put great emphasis on change management.</p>	

Lóránt A. (Lóri) Tavasszy
Professor, Freight & Logistics

www.tudelft.nl

Prof. Tavasszy is Full Professor at the Delft University of Technology. He obtained his PhD at the TU Delft in 1996 and has been with TNO between 1996 and 2016, combined with part time Professor positions at the Radboud University Nijmegen (2004-2009) and TU Delft (2009-2016). His research involves freight and logistics models, long term freight forecasts, innovative transport systems (city logistics, underground transport, multimodal transport) and cost-benefit analysis of major transport projects and policies. He leads national and international programs, publishes frequently and holds regular lectures in the Netherlands and abroad. He actively participates in committees of the Dutch Shippers Council EVOFENEDEX, the Association for European Transport AET, ERTRAC (European Road Transport Research Advisory Council), TRB (Transportation Research Board) and WCTRS (World Conference for Transport Research Society, Chair of Scientific Committee 201-2019) and is a founding member of the new global Volvo Center of Excellence on Sustainable Urban Freight Systems. Prof. Tavasszy is also a member of the ERTRAC Working Group on Long Distance Freight Transport and member of the Scientific Committee of the Centre for Sustainable Road Freight.

The TU Delft was founded in 1842 and now houses 2500 scientific staff including over 17.000 students in all areas of Engineering. It has Faculties in all disciplines underlying the field of Logistics, is a key participant in the Dutch research school TRAIL, the national network for Transport, Infrastructure and Logistics and the Dialog research programs.

	<p>Rik Arends Program Director at Smart Freight Centre</p>	 <p>Smart Freight Centre</p>	<p>www.smartfreightcentre.org</p>
<p>Rik is the Program Director at Smart Freight Centre, in this capacity he leads and oversees the development and implementation of various programs across Smart Freight Centre, in partnership with GLEC members, affiliates and research institutes. Example programs include the support to the development of a Low Emissions Fuel and Vehicles program, and implementation of a new Data access for logistics emissions accounting and reporting protocol. and leading our training programs.</p> <p>Rik is trained as a civil engineer in sustainable transport with 10 years' experience in consultancy and policy development of freight and transport solutions in multiple countries.</p>		<p>Smart Freight Centre (SFC) is a global non-profit organization dedicated to an efficient and zero emissions freight sector. We cover all freight and only freight. SFC works with the Global Logistics Emissions Council (GLEC) and other stakeholders to drive transparency and industry action – contributing to Paris Agreement climate targets and Sustainable Development Goals.</p> <p>Our role is to guide companies on their journey to zero emissions logistics, advocate for supportive policy and programs, and raise awareness. Our goal is that 100+ multinationals reduce at least 30% of their logistics emissions by 2030 compared to 2015 and reach net-zero emissions by 2050.</p>	

	<p style="text-align: center;">John Smith</p> <p style="text-align: center;">Head of Sustainable Infrastructure and Facilities Management</p>		<p>https://www.anpost.com/</p>
<p>John Smith is the Head of Sustainable Infrastructure and Facilities Management at An Post. John has held this position since 2006, previous to that John started his career as an apprentice with Guinness in Dublin, where he progressed to hold the position of Technical Manager at Guinness Ireland. Following that he held the role of Services and Quality Manager at Vector Workplace and Facilities Management. John holds degrees in Property and Facilities Management and in Economics.</p> <p>Through his role in An Post John is responsible for all sustainable infrastructure. John leads the sustainability team, manages the built environment of the An Post property portfolio (over 2m square feet) and is responsible for the roll out of electric vehicle charging infrastructure. John is also the Chair of Post Europe's Green Mobility Forum, which consists of over 50 postal and logistics organisations.</p> <p>Central to John's role is working on innovative projects related to property and fleet. Currently, he is the An Post lead for project SENATOR, an international collaboration between An Post, Correos (Spanish Postal Service), the city of Zaragoza and Dublin City Council. Project SENATOR, a Horizon 2020 project, aims to develop an online platform which will manage and optimise freight collections and deliveries in Dublin city.</p> <p>John's current focus is on the transformation of the An Post heavy goods fleet. An Post is ready to be a first adopter of zero emission HGV technologies and John has begun exploring hydrogen as a potential fuel alternative for long-haul vehicles. In the interim John has facilitated the trial of B100 HVO (Hydrotreated Vegetable Oil) due to commence in mid-September. An Post will be the first major fleet to test a B100 HVO fuel in Ireland</p>		<p>An Post is Ireland's national postal operator serving 2.2 million addresses every working day and more than 1.7 million post office customers every week. An Post employs circa 9500 people through a network of retail offices and delivery service units, making An Post one of Ireland's largest companies. An Post is responsible for delivering the highest quality postal service to every home and business in Ireland, whilst simultaneously growing their national and international eCommerce parcels, logistics and mail marketing businesses. Through their retail offices they manage more cash than any other organisation in Ireland. An Post are always diversifying and evolving their financial and retail services whilst continuing to provide trusted access to government services both online and in person.</p> <p>An Post operates one of Ireland's largest vehicle fleets. In 2018 they began the electrification of their light commercial transport fleet. Since then, over 1000 electric vehicles have been purchased, including Ireland's first 7.5 tonne electric trucks. Electric vehicles now make up 28% of the An Post fleet. In 2019 they introduced emission free deliveries in Dublin city, making them the first postal service provider in the world to achieve zero carbon emission delivery status in a capital city. They have now expanded emission free deliveries to the cities of Kilkenny, Waterford, Limerick and Cork. By the end of 2021 emission free deliveries will be extended to Galway city as well as other urban and rural locations.</p>	

	<p style="text-align: center;">Andrea Condotta Public Affairs & Innovation Manager</p>		<p style="text-align: right;">www.gruber-logistics.com</p>
<p>Graduated in Political Science, he began his career as consultant for public bodies and private companies. In 2010 he started working in the logistics and freight transport sectors through a cooperation with Venice Port Authority that will last for five years among other collaborations.</p> <p>In 2015, he joined Codognotto Group as Marketing & Innovation Manager where he took care of several innovation projects and the definition of company's marketing strategy. In 2017 he was a TEDX speaker. In 2020 he moved in Gruber Logistics as Public Affairs & Innovation Manager in a transport and logistics company located in ten countries with 35 operational offices. He is also a member of the Board of the European Commission for Policy Development on the Digitalization of Logistics and Transport (DTLF)</p>		<p>Gruber Logistics is a transport logistics company operating in all Europe through 35 branches. The company has defined its strategic path developing the concepts of digitalization and sustainability as proposition values in the market. In terms of environmental sustainability, the company is progressively pushing towards a systematic modal shift and the use of alternative fuels. The large part of its business is focused on heavy weight international transports largely operated by own trucks. Its fleet is composed by 500 trucks of which 100 are LNG and 50 Biodiesel.</p> <p>The company has defined a precise timeline for its fleet's strategy which foresees the total renew of the fleet (now the average is two years) and a progressive deployment of BIOdiesel and LNG trucks considered the most interesting solution now available in the market for CO2 and particulate reduction.</p> <p>The next perspective considered is BIOlng which can guarantee a massive reduction of CO2 closed to 95%. Nonetheless, the market is not offering enough quantities for a real and concrete deployment, but Gruber Logistics has already launched a specific project foreseen the assurance of the Bio molecule. The lack of qualified biomasses prevents BIOlng to be the only solution applicable towards the 0 emissions journey. As next step, Gruber Logistics is looking with interest Electric and Hydrogen solutions.</p>	

	<p>Graham Major-Ex Head of Green Revenue</p>		<p>www.sennder.com</p>
<p>Graham Major-Ex is the Head of Green Revenue at Sennder, where he is responsible for advanced fuels, e-mobility and carbon strategy at Europe's leading digital freight forwarder with over \$350 M in funding raised.</p>		<p>Sennder is Europe's leading digital freight forwarder offering shippers access to its connected fleet of thousands of trucks.</p>	
<p>Graham has received his:</p> <ul style="list-style-type: none"> - MBA in Renewable Energy from Berlin Beuth University of Applied Sciences - Bachelor's Degree in Economics and Chinese from Middlebury College 		<p>In a traditional industry it is moving fast and focuses on building up Europe's largest fleet of advanced fuel vehicles as well as the digitalization and automation of all road logistics processes.</p>	
<p>International Experience: 12 Years</p> <ul style="list-style-type: none"> - 3 Years: Europe - 6 Years: China - 3 Years: New York 		<p>By leveraging its proprietary technology, and low-carbon expertise sennder builds a system that leads the industry into the 21st century with a new degree of transparency, efficiency and sustainability</p>	
<p>Professional Experience Highlights:</p> <ul style="list-style-type: none"> - Sennder, Head of Green Revenue, Berlin – since 2020 - American Express (Fortune 100 Company) Global Business Strategy, New York - CBRE, (Fortune 500 Company) Head of Retail, North China, Beijing 			
<p>Professional Engagement:</p> <ul style="list-style-type: none"> - World Economic Forum, Road Freight Zero – member since 2020 - National Committee on US-China Relations – member since 2016 - Urban Land Institute, Board Member, China – from 2012-2015

	<p style="text-align: center;">Salvador Furió Valenciaport Foundation Director of Innovation & Port Cluster Development</p>	 	<p style="text-align: center;">www.valenciaport.com/ www.fundacion.valenciaport.com/</p>
<p>Salvador Furió holds a PhD in Industrial Engineering from the Polytechnic University of Valencia and a Master of Science in Port Management and Intermodal Transport from the University of Comillas (ICADE). After six years of experience as Project Director at LOGISTA, the main Spanish logistics operator, he joined the Valenciaport Foundation in 2004 as Director of Logistics and Intermodality. Since then, he has participated and directed numerous consulting, research and cooperation projects at national, European and international levels, always related to container logistics, maritime, railway and intermodal transport, trade facilitation, planning and design of logistics platforms or energy efficiency and environmental management. In recent months he has taken on a new responsibility in the entity as Director of Innovation and Development of the Port Cluster, coordinating the areas of digital transformation, sustainability, port logistics, port-city integration and market intelligence. In addition, he collaborates regularly giving classes in different master programs of the Universities of Valencia and Castellón, is director of the course of Single Window of Foreign Trade of the Inter-American Development Bank and participates in national and international congresses of transport and logistics</p>		<p>Valenciaport is a Spain Core Port of the EU TEN-T Mediterranean Corridor. It specialises in general cargo, accounting for over 90% of its cargo volumes, and particularly containerized cargo which positions Valenciaport as 5th European Container port and first in the Mediterranean. It closed 2018 with end year record figures, reaching 76.6 M. Tons total cargo and 5.1 M. TEU.</p> <p>Valenciaport is thus a major gateway to Europe in Spain and plays also a significant role as a redistribution center in Western Mediterranean since some 53% of its containerized cargo is transshipment. Main regional and national industrial sectors benefiting of Valenciaport facilities and services includes car & equipment manufacturing, building materials, agricultural products, consumer goods, energy products, iron and steel products, and chemical products. Valenciaport is the main gateway in Spain for trade with China (Asia), the USA (America) and Algeria (Africa), among many other countries. To cope with current challenges Valenciaport strategy concentrates on market orientation, service efficiency, intermodal and logistic integration, and economic, environmental and social sustainability, supported all those aspects by a timing incorporation of new technologies. Valenciaport Foundation (VF) is the knowledge and innovation centre for the leading port cluster in the Mediterranean: Valenciaport. It is an initiative of the Port Authority of Valencia that brings together key companies in the port – maritime transport – logistics sector, as well as universities and institutions linked to the port community of Valenciaport. Since its creation, VF has developed 242 projects in more than sixty countries, mainly in the Mediterranean, the rest of Europe, Asia and Latin America</p>	

	<p>Zisis Palaskas Business Intelligence Head, Managing Brussels Office</p>		<p>www.inlecom.com</p>
<p>Zisis Palaskas has joined Inlecom in 10/2013, leading Research and Development projects, as director in Business Intelligence and Data Analytics. He specialises in the area of Transportation and Logistics, in integration technologies, information exchanges, data modelling, information architectures, agile methods. International Consulting Companies:</p> <p>As e-business manager in Deloitte & Touche Consulting developed the service line of Information Technology Services, focusing on E-Business B2B services, also managing client engagements for IT strategy and EURO. As manager in KPMG Management Consulting in Business and IT consulting Services, he managed IT Strategy, MIS, Financial Business Modelling, and Euro transformation projects for Greek Public Sector, Banks and the Hellenic Post. Greek technology SMEs:</p> <p>In the past he assumed various management positions in Greek IT SMEs, including software services for betting systems (ATC), business intelligence solutions Financial and Operations Improvement (Cinsight), business development for a Model Driven Agile Development Platform (CLMS). IT Manager (Kintec) in hitech solutions for security, member of the product development team of the Intelligent Shelter solution for antennas sites of mobile operators, and customer projects delivery. He was Technology Director in 01PLIROFORIKI, a large IT SME, leading the R&D, Software Development, and Consultancy activities. Public Sector Advisory Positions: He was Information Technology Consultant to the President of the Hellenic Telecommunications and Post Commission, EETT (2007-2009). He was advisor to the General Secretary of Information Technology in the Min. of Economics & Finance, GSIS (2002-2004). Recent assignments related to the theme: With Inlecom he has assumed leading research role in reference EU research projects in the supply chain and transport domain, including cross-border trade:</p> <p>SELIS, PROFILE, CORE, ICARGO, EUROSKEY, SAFEPOST, ICONET, TRACK & KNOW, CHARIOT, ST4W.</p> <p>He is a member of UN/CEFACT, project leader of the Buy-Ship-Pay Reference data model (BSP-RDM) project, approved and published on the 13th of August 2019 (http://www.uncefact.org/uncfact/mainstandards.html)</p>		<p>INLECOM is a European SME with offices and consultants in Belgium, Greece, UK, Ireland, Spain, and Italy. Originally established in 1996, with the seminal charter of promoting innovative Information Learning and Communication Solutions, INLECOM has since expanded upon these foundational competencies over the last 20 years. INLECOM is now an established leader in Digital Ecosystem Platforms & Technologies. INLECOM Group (INLE) is the Brussels-based Research and Innovation Centre of INLE dedicated to advanced solutions. With an international team of experts in the areas of Mobility, Business Consulting, Software Engineering Solutions and Business Analytics, INLE provides strategic knowledge-centric solutions to help private and public organizations use their unique capabilities to create or strengthen their competitive advantage. Core competencies include:</p> <ul style="list-style-type: none"> •Management Consulting: Business Processes Improvement and Transformation, Organisation Excellence for Supply Chain, Risks Management, Governance, Compliance, New Business Models in Supply Chain, Innovation Management & Patent Filings. •Analytics and Integration: Business Analysis, Business Modelling, Key Performance Indicators and Analytics, B2B and B2G integration, Information Exchanges, Message Exchanges Standards, Port Community Systems, Single Windows. •Systems and Information Architectures: Public/Private/Hybrid Cloud Solution Architectures for Big Data and Internet of Things, including innovative business intelligence, big data analytics, data mining and blockchain technologies. Moreover, INLECOM is member of: •the Big Data Value Association (BDVA) (http://www.bdva.eu/) •the Alliance for Internet of Things Innovation (AIOTI) (https://aioti.eu/) INLE is dedicated to research and innovation in the mobility, transport, cloud, and big data sectors covering policy, strategy, operational processes, and ICT. INLE has established a unique holistic view of the ICT domain through an extensive research programme including a library of process models, domain entities, ontologies and client-facing solutions. In addition, INLE has developed and applied blockchain expertise through projects and initiatives using this technology, while enhancing its capabilities in the area of data protection and privacy with an emphasis on GDPR compliance. Currently, INLE is the coordinator of four high profile H2020 projects, in the areas of IoT, Security, Big Data and Cloud technologies. 	

	<p>Kris Neyens Manager Internationalization</p>		<p>Home - VIL</p>
<p>Kris Neyens is a supply chain expert with a long track record in change and innovation projects both in private and public-private collaboration projects in challenging and highly competitive environments.</p> <p>More than 30 years of experience in supply chain innovation.</p> <p>He is Manager Internationalisation at VIL, Flanders' sole innovation spearhead cluster for logistics and is involved in both regional and international innovation projects.</p> <p>Kris played a pioneering role in various innovation projects focusing on concepts such as nearshoring, supply chain resilience but also on alternative transport routes and modes such as transcontinental rail transport and autonomous transport. He currently takes on the role of theme manager Hyperloop for Flanders to explore the possibilities for the region to connect with the hyperloop-ecosystem through its core competences and thereby supporting its development.</p> <p>Kris currently acts as vice-chair in WG2, hubs, corridors and synchromodality at ETP-Alice.</p> <p>BELIEVES IN INTERNATIONALISM, MODERNISM, COLLABORATION AND CREATIVITY</p>		<p>VIL is Flanders' sole innovation spearhead cluster for logistics. It is also a membership organization that harbours some 600 logistics stakeholders (http://vil.be/en/about-vil/vil-members/members/).</p> <p>It is the region's reference when it comes to company-oriented innovation in logistics. The primary focus lies with projects throughout the complete TRL range and their subsequent valorisation.</p> <p>Through a VIL member survey, several validation exercises with (inter)national stakeholders and several brainstorm sessions, the following focus domains were set:</p> <p>Digital Transformation, Green Logistics, Hinterland Connectivity and Urban Freight. This directly aligns with the ALICE thematic groups.</p> <p>VIL is also increasing its international efforts as this is a key strategy in support of the overall cluster objectives. VIL focuses on co-ordination and collaboration with international cluster organizations and coaches its cluster members while participating in European projects itself or supports them to directly join various consortia. In this respect, the active engagement in international networks is pivotal.</p> <p>The drivers behind this strategy are to provide access to markets and knowledge, to raise to profile of our members, to raise the profile of the cluster and to influence funding and policy.</p>	

Philip Van den Bosch
Thought Leader & Program Manager at Lineas
Senior Policy Advisor at UIC

www.lineas.net

www.UIC.org

*With side steps into finance, commercial and economic & innovation policy, Supply Chain has been the central theme in a career of over 25 years. I hold an **econometrics** degree obtained at the Catholic university of Louvain complemented with master degrees in supply chain management (**CSCP**) and purchasing (**ADIPS**). In 2008, I was the proud winner of the **Belgian Supply Chain Award** – price of the audience with a project on reducing working capital by creating transparency in the Supply Chain.*

*I combine a wide **industry experience** as employee (Novartis, Frito Lay, Sarens, Lineas) with 12 years of **consultant and partner** at a consulting firm. Transport, Working Capital and purchasing projects have been my core focus. The chemical industry (e.g. SABIC), FMCG (Tropicana, Danone...) and governments have been my preferred fields of activity.*

*For the last 3 years I have been working in the rail freight sector (**Lineas** and UIC) as liaison between the organisation and the different policy levels in Flanders, Belgium and Europe. In this function I'm the co-author of the RailFreight vision 1.0 and 2.0 for the RailFreightForward coalition. As senior policy advisor for the **International Union of Railways in Paris** I'm considered as the right hand of the freight director where I assist her on different strategic European and International policy issues.*

*Finally, as **Thought leader and program manager** I oversee and drive a number of business innovation programs. Recently Lineas presented its result of the European LessThanWagonLoad program where we stretch the beacon in rail transport to efficient pallet load handling.*

My contribution lays in a number of aspects:

- I have a **broad perspective** of Supply Chain Management from experience within different industries – customers and logistics operators.
- I have a nice **network** (at policy maker, industry and academic research) since Public affairs activities are at the core of my tasks within Lineas and UIC.
- My knowledge goes **beyond theoretical concept** since I have led small and large teams for 10 years in 3 different companies.
- In a number of projects, I broad different audiences together (as advisor for the Flemish Minister of Economy, as program manager in LessThanWagonLoad, as writer of the 30 by 2030 rail freight vision paper).
- And I possess a **fluent writing style**. I have been acting as a ghost writer on many occasions and was successful in applying for public funding or applying for grants.

Rail is a mode of transport with a lot of history. Furthermore, it will be able to contribute to the realisation of a carbon free Europe as it is by far the most environmentally friendly mode of transport. With 9 times less CO² and 6 times less Nox emissions, 6 times less energy consumption and 85 times less casualties due to accidents it outperforms all other modes of transport by far.

Nevertheless, rail has a competitiveness issue since currently it is only competitive as of longer distances. Becoming more cost competitive, also on shorter distance, will be the main challenge for the rail sector within the next 10 years. Creating a level playing field by correct internalisation of external costs is one way. Even more important will be innovation to increase agility and flexibility and to reduce costs of transshipment and handling. Me as responsible for business innovation and lineas more in general have made these innovations as part of their strategic goals. This is why Lineas participates in a number of strategic innovation programs like DisPatch (VUB and others) or develops alternative loading solutions to make small load sizes more attractive for rail. I have played and I'm still playing a core player role in functions as program manager or as member of advisory boards.

In the DisPatch program I can count upon a reference of Prof. Dr. Tomas Ambra of the VUB. In the past I have also been in close contact with Sergio Barbarino and Prof Dr. Robert Boute from the KU Leuven.

Lineas is the largest private rail freight operator in Europe offering premium rail products and total door-to-door logistics solutions. Its mission is to offer such superior rail products and services that customers shift the transport of their goods from road to rail. This allows them to improve their supply chain while decreasing their impact on mobility, climate and air pollution.

UIC, the worldwide professional association representing the railway sector and promoting rail transport

UIC leads an innovative and dynamic sector, helping Members find continuing success and opportunities.

Members are invited to take a proactive role in the UIC working groups and assemblies where the railways' position on regional/worldwide issues is shaped. Active participation in the working groups is a unique opportunity to voice opinions and benefit from the weight of the railway sector at a coordinated worldwide level.

UIC is the association for technical cooperation amongst railways and coordinates the sector's position as it negotiates its evolving relationship with the supply industry and research and develops needs in order to draw full advantage of potential interest to railway companies.

	<p style="text-align: center;">Dr. Thomas Van Asch Strategic Projects Management</p>	 <p style="text-align: center;">AirCargoBelgium</p>	<p style="text-align: center;">https://aircargobelgium.be/</p>
<p>Thomas Van Asch (°1993) graduated as a doctor in Applied Economics at the Faculty of Business and Economics of the University of Antwerp. His main areas of research are in the fields of air cargo, e-commerce and airport strategy development. Thomas' PhD dealt with the strategy of European airports regarding air cargo and their competitiveness. Before obtaining his PhD, Thomas finished his Master of Applied Economics at the University of Antwerp and his Master of Air Transport at C-MAT. Currently, Thomas is also working for Air Cargo Belgium as a Strategic Project Manager. In this role, he is responsible for the long-term strategic vision of ACB in which innovative logistical concepts like Physical Internet play a central role. Next to that, Thomas is writing proposals to obtain European funding and is responsible for different working groups within the company.</p>		<p>As the air cargo community representation, ACB (Air Cargo Belgium) strives to make BRUcargo the most attractive, efficient, innovative and successful logistical platform.</p> <p>On behalf of airlines, handlers, forwarders, the airport authority and other stakeholders, we set out strategic and ambitious goals for the development of air cargo. We put in place procedures for improved operations, take the lead in projects and we get in contact with all stakeholders and government agencies to address topics of common interest. We do this by a strong community cooperation and approach.</p> <p>At all times, our goals and objectives are in the interest of the air cargo community as a group and to the overall benefit of our industry.</p>	

Dipl.-Ing. Lars Deiterding
Executive Director HaCon
Governing Board Member Shift2Rail
Chairman UNIFE Freight Committee

www.hacon.de

Lars Deiterding is working for HaCon for 18 years, since 2007 he is head of the Freight Transport and Logistics department and working on projects related to railway and intermodal transport and innovations in multimodal freight transport. Since 2012 he is also Executive Director at HaCon and is additionally leading the international research activities of the various departments.

In the role of project coordinator, manager and senior consultant he is responsible for several consultancy projects for clients such as combined transport operators, railway operators, infrastructure managers, the national Ministry of Transport and DG TREN of the European Commission. He has more than 20 years of experience in research and expert analysis activities in all areas of the international transport industry focusing on the following fields: Planning and design of railway systems, infrastructure assessment and timetable analysis, expert analyses for rail operations with several different analysing tools, determination of the efficiency of railway systems, consulting in the field of integrated transport chains and research and development of combined transport.

Within the projects mentioned above he has gained a comprehensive overview of the International European rail freight market. He led and is leading the multiannual, multi-disciplinary projects TREND, CREAM, TIGER, TIGER-Demo, ViWaS and SPIDER PLUS in the last year and is the project manager of several running studies for Rail Freight Corridors and the European Commission. In the last years, the design and implementation of appropriate IT-systems for transport optimization got higher into his focus and as already for IP5 in Shift2Rail he is now involved in the preparation of the Flagship Area on Freight in the new Europeans Rail Joint Undertaking. Since the acquisition of Hacon as innovation driver in the mobility sector by Siemens Mobility, he is steering several Siemens activities for combining freight related solutions.

HaCon provides cutting-edge software solutions for public transportation, mobility and logistics.

Our three business units, HAFAS, TPS and Consulting, provide more than 370 highly qualified specialists and more than 35 years of experience for your success.

From trip planning to mobile ticketing and fleet management; our HAFAS product suite covers all aspects of Intelligent Transportation Systems and creates the ultimate end user experience.

HaCon's TPS solutions for train planning and capacity management enable network providers and operators to make the most of their infrastructure.

Dr. Angelos Amditis
Research Director

<https://i-sense.iccs.gr>

Dr. Angelos Amditis (PhD, MBA) is Research Director in the Institute of Communication and Computer Systems (ICCS), and member of its Board of Directors. Since 2002, he is the founder and the Director of the I-SENSE Research Group of ICCS that currently employs more than 100 researchers, technicians and administrative/support personnel.

He represents the Institute of Communication and Computer Systems (ICCS) in ERTICO - ITS Europe, where he is the Chairman of the Board of Directors. He is member of the Executive and Steering Group of ALICE (co-Chair of the TG3: Systems & Technologies for Interconnected Logistics). He is one of the initiators of the EuroVR Association where he served as President from September 2010 till March 2016. Currently he is the Vice President and member of the Executive Board. He was one of the founding members of ITS Hellas, serving as a President till 2016 and now serving as Vice President. He is the National Representative of Greece at EU on Co-operative Connected and Automated Transport and Mobility (C-ITS and CCAM). He is the Deputy Chairman of the Athens Urban Transport Organisation (OASA) and member of the Board of Directors of the Athens Water Supply and Sewerage Company (EYDAP S.A.). He is the Chairman of the Steering Committee of the Hellenic Port Community System (HPCS) of the Piraeus Container Terminal S.A. (PCT) and Member of the Innovation Platform of the Hellenic Corporation of Assets and Participations S.A. (HCAP). He is a Member of the Greek Delegation team of the "shadow" thematic sub-group for Climate, Energy and Mobility as part of the "Shadow" Strategic Committee (SPC) for the configuration of the new work programmes of Horizon Europe (2021-2024) and Member of the Working Group on Transport and Supply Chain of General Secretariat for Research and Technology (GSRT) Platform.

Angelos is currently coordinating 13 EC-funded projects, i.e. the newly accepted projects EIFFEL, 5G-IANA and NIGHTINGALE and the ongoing projects Innovation cluster for protection and security against environmental hazards, echarge4drivers, INGENIOUS, HYPERION, CitySCAPE, IN-PREP, DIONE, Cyber-MAR, RESIST, and ICT4CART. He has also participated in more than 150 research projects during the last 20 years, including in the

EC-funded projects COREALIS, ELVITEN, PLUGGY, SCENT, NeMo, SAFERtec, AutoNet2030 and INTE-TRANSIT as a coordinator and the MOSES, BOOSTLOG, 5GLOGINNOV, FENIX, CAPITAL, CLUSTERS2.0, ASSURED, interACT, INFRAMIX, L3Pilot, CARTRE, ITS-Observatory, SMARTPORT, AdaptIVe, interactIVe, euroFOT, TELEFOT, PReVENT as a scientific responsible.

His current research interests include automation in road transport, highly and fully automated driving, cooperative systems in transport, electromobility, vehicle to grid connectivity and charging optimization strategies, smart mobility for people and freight, simultaneous Localisation and Mapping in indoor and outdoor environments, PaaS/SaaS for logistics applications, computer vision and machine learning, data analytics, sensor and information fusion, IoT and Cyber Physical Systems, next generation communication technologies, ergonomics and human-machine interaction, Circular Economy, 5G technology.

He is participating or has participated to the CCAM, C-ITS Platform, 5G IA, PSCE, ILME, MaaS, INATBA, EGVIA, OCG, A.SPIRE, DTLF, GEAR2030, TM2.0 Platform (Steering Body member), Trilateral WG on Automation, euRobotics, SENSORIS, WssTP, UITP, AIOTI and many other EC Groups and Platforms. He is the writer of 100 peer reviewed journal articles and book chapters and more than 240 conference papers.

The Institute of Communication and Computer Systems (ICCS) is a non-profit academic research body established in 1989 by the Greek Ministry of Education to carry out research and development activities in the areas of telecommunications, sensors and sensor networks, electromagnetic sensors, satellite and wireless communications, telematics and multimedia applications, transport applications, control systems, biomedical engineering and electric power (www.iccs.gr). It is closely associated with the School of Electrical and Computer Engineering of the National Technical University of Athens (NTUA) (est. 1837), which is the oldest and most prestigious academic institute in Greece. The personnel of ICCS consists of academic staff (~80 University Professors), 40 senior researchers and more than 500 researchers (including PhD students) in twenty research laboratories.

Within ICCS, the I-SENSE Research Group (<http://isense.iccs.gr>) is very active in areas dealing with vehicle automation, C-ITS, IoT applications for people and freight transport, smart mobility, supply chain management, innovative middleware/Platform as a Service (PaaS) solutions for many application domains (environment, logistics, structural health monitoring and security), embedded systems and sensor networks, next generation communication technologies and many more.

The I-SENSE Research Group comprises more than 100 members (academics, post doctoral and post-graduate researchers and administrative staff). It has coordinated and participated in numerous research and development activities in the framework of European and national projects. Indicatively, the following projects are worth mentioning: in H2020, it is the coordinator of HYPERION, COREALIS, ELVITEN, IN-PREP, SAFERtec, PLUGGY, SCENT, NeMo, RESIST, ICT4CART; in FP7 and NTERREG, FABRIC (coordinator), INTE-TRANSIT (coordinator), SMARTPORT, VRHyperspace, GAME-ABLING, ManuVAR, AutoNet2030 coordinator), AdaptIVe, CityMobil2, TEAM, MOBiNET, INACHUS (coordinator), RECONASS (coordinator), ROBOSPECT (coordinator). More details can be found here: <http://i-sense.iccs.gr>

ICCS is a member of ALICE since 2014 and in 2019 the Director of I-SENSE Group, Dr. Angelos Amditis became the co-Chair of the TG3: Systems & Technologies for Interconnected Logistics.

ICCS and the ALICE organisation have a strong history of successful collaborations under the following projects: COREALIS, MOSES, BOOSTLOG, 5GLOGINNOV, FENIX, CAPITAL, CLUSTERS2.0.

Andreas Nettsträter
Strategic initiatives and
European networks

www.iml.fraunhofer.de/en/

Andreas studied Computer Science with minor Mechanical Engineering at the University of Dortmund. He is responsible for strategic initiatives and European cooperation at the Fraunhofer Institute for Material Flow and Logistics in Dortmund. His focus is on innovative ICT solutions for logistics and manufacturing, like autonomous systems, the Internet of Things and artificial intelligence.

The Fraunhofer Institute for Material Flow and Logistics IML is the world-wide recognized and first-rate address for a holistic, interdisciplinary networked logistics and supply chain management. The various departments of Fraunhofer IML cover all competences for the fulfilment of the wide-ranging and comprehensive task for this study. In these innovative fields, Fraunhofer IML has done fundamental and outstanding work in numerous initiatives, research projects and industry projects. This includes the »Internet of Things«, which is essentially developed by Fraunhofer IML for logistics and implemented into successful projects in accordance to the guideline »Efficiency enhancement through autonomization «and» Industrie 4.0.

	<p>Wout Hofman Senior Scientist</p>		<p>https://www.tno.nl/en/</p>
<p>Wout Hofman (1959) is a senior scientist in Data Science, holds a PhD in information technology on the development of a conceptual model for a software system to support customer driven business process orchestration in transport and logistics (logistics control tower, 1994). He has a broad experience in interoperability between organization and systems, starting in 1985 in the port of Rotterdam. Amongst others Wout has worked for the EC (DG Taxud – interoperability design of the Transit system and DG JAI – Architecture of Schengen II) as an IT architect and has written the initial specification of the Rotterdam port system. He has a broad experience in customs and international trade. Recently, he has been responsible for the IT development in EU FP7 SEC Cassandra, - CORE, and the H2020 Smart-Rail project. Furthermore, Wout performed a Policy Impact Assessment study for interoperability in eFreight, he supports the Digital Transport and Logistics Forum of EU DG Move by providing a first draft of system-of-systems for data sharing in supply and logistics (including governance aspects), and he is the architect of the Digital Inland Waterways Architecture developed on behalf of EC DG Move. Wout also supports the Dutch Ministry of Infrastructure and Water in realizing their Digital Transport Strategy, both in the Netherlands and in Europe in close collaboration with other Member States in the CEF funded FEDeRATED Project as CIO. Wout is also IT coordinator of the H2020 PROFILE Project for applying data analytics in customs risk analysis and is leading scientist of several Blockchain projects in supply and logistics. Wout is author of over 110 scientific publication and author of three books on interoperability and chain management in supply and logistics</p>		<p>TNO is one of the major contract research organizations in Europe. With a staff of approximately 3500 and an annual turnover of 580 million Euros, TNO is carrying out research in order to achieve impact on the following seven themes: Healthy Living, Industrial Innovation, Urbanization, Energy, and Defense, Safety and Security. TNO functions as an intermediary between basic research organizations and industry. By translating scientific knowledge into practical applications, TNO contributes to the innovation capacity of businesses and government. TNO is involved in many international projects (about 30% of the market turnover), including EU-funded collaborations. TNO functions as an intermediary between basic research organisations, government and industry. By translating scientific knowledge into practical applications, TNO contributes to the innovation capacity of businesses and supports the policy and regulatory developments in government. TNO is involved in many international projects (about 30% of the market turnover), including EU-funded collaborations (Technology Platforms, Horizon 2020, KICs). TNO is active in the Big Data Value Association (BDVA) where it is leading a Taskforce and a Study Group, and Several standardisation initiatives in ISO and CEN, and is also the founder of the national platform on Linked Open Data. TNO has performed project management and scientific coordination of various EU funded projects in both logistics and customs. Currently, TNO is coordinating IT in the H2020 PROFILE project, focusing on risk assessment with data analytics from a customs perspective. TNO is assessing the required functionality of a data preparation platform, integrating with a deep learning algorithm(s) that TNO will tailor to detect specific risks from the customs risk taxonomy. A semantic layer is constructed to decouple data preparation of various logistics data sets from data analytics. Within Unit ICT, TNO performs applied research in monitoring and control systems, cybersecurity, networking, and data science. TNO is a member of EARTO, the European Association of Research and Technology Organisations. www.earto.eu. TNO is also member of the ETP ALICE, the Big Data Value Association, and Ertico</p>	

	<p>Eusebiu Catana Senior Manager (at ERTICO)</p>		<p>http://ertico.com</p>
<p>Dr. Eusebiu Catana— is Senior Manager in the Innovation&Deloyment Department at ERTICO-ITS Europe. He Holds a PHD in Vehicle Telematics, Master Degrees in Electronics Engineering, Operations Research and in Industrial Management and as well as Project Management Professional (PMP)[®] and CISA certifications. He has started his career at ACUNIA in Belgium as software developer for the On-Star software project for General Motors in the field of vehicle telematics. He has previously worked as a Technical Consultant in R&D for about 20 years for top technology companies in Europe and USA (e.g. projects: On-Star, Vehicle Telematics, TRIDENT, OTAP, CO-GISTICS, AEOLIX, COREALIS, CONCORDA etc.). In 2002 in Munich he was awarded with the “best award for ITS project development” from the IT/Automotive industry. He is leading the team1-conceptual interoperability of Digital Transport and Logistics forum (DG MOVE). Within ERTICO, he was project coordinator for the CO-GISTICS and at the moment he is project coordinator for the CONCORDA (26 partners, 20 MEuro) and FENIX (62 partners, 60,6MEuro) projects- CIP framework programme and CEF project respectively, for the AEOLIX(41 partners, 17MEuro) and COREALIS project, both H2020 RIA programme. His areas of expertise are: ITS cloud platforms, big data, AI, ML and MaaS/DaaS services</p>		<p>ERTICO – ITS Europe was founded in 1991 at the initiative of 15 industry leaders and the European Commission to fill the gap between research and deployment of mobility services on roads. In the past two decades, ERTICO ran dozens of European projects, organised 38 ITS European and World Congresses, grew from 15 to 121 Partners, undertook a key role in public consultations, policy agendas, standardisation organisations, and established long-term relations with key players in Europe, United States of America, Japan, Russia, and China.</p> <p>ERTICO-ITS Europe through their members has played in the first mandate an active role in all the DTLF teams. Moreover, ERTICO-ITS EUROPE in the first mandate was very active involved in the SG2 as team leader 1 and in the next mandate can have an important contribution to the successful accomplishment to the DTLF future pan-European federated architecture</p>	

	<p>Jon Kuiper Senior Policy Advisor Supply Chain Digitalisation</p>	 <p>Ministerie van Infrastructuur en Waterstaat</p>	<p>Ministry of Infrastructure and Water Management Government.nl</p>
<p>Jon Kuiper has a broad background in international supply chain operations. Jon has held various senior management positions with Xerox and Philips and was a CEO of a logistics service provider for a number of years. In the past years he has been leading a start-up in the automotive supply chain, using blockchain technology to foster collaboration between network partners. In his current role Jon is focused on the digital transition of Dutch businesses active in the logistics field.</p>		<p>The Ministry of Infrastructure and Watermanagement is responsible for the policy on digitalisation of the supply chain infrastructure of the Netherlands. Leading the development towards federative data sharing and supporting logistics businesses in the digital transition</p>	

	<p>Giannis Kanellopoulos Unit Leader Logistics & Maritime</p>		<p>https://i-sense.iccs.gr/</p>
<p>Giannis Kanellopoulos is currently the Unit Leader of Logistics and Maritime at the Institute of Communications and Computer Systems (ICCS). He holds a BSc in Computer Information Systems from the American College of Greece, an MSc in Software Engineering from the University of Nottingham, UK and an MBA from Durham University, UK. In the past, he has been a part-time member of the Faculty of the American College of Greece (Deree College) for six years.</p> <p>He has more than 20 years of experience in systems analysis, software engineering and data networking. He was the data network architect and project manager for the Athens 2004 Olympic Games and has participated in systems design for several banks and telecommunication organizations. Giannis was a member of the IT team of the Piraeus Container Terminal for 10 years, participating in all major projects of the company related to the design of the port digitilisation and the setup of international logistics services between Europe and China. He has been dealing with EU and nationally funded research projects for over 20 years and he is currently actively involved in seven logistics related projects (PIONEERS, COREALIS, FENIX, MOSES, 5G-LOGINNOV, GREEN-C-PORTS, BOOSTLOG)</p>		<p>I-SENSE is one of the Research Groups of the Institute of Communication and Computer Systems (ICCS) of the National University of Athens in Greece (NTUA). Founded in 2002, I-SENSE Research Group is committed to the highest standards of academic excellence and research innovation in the field of electrical, electronic and computer engineering & technologies.</p> <p>Research at I-SENSE focuses on Intelligent Transportation Systems, Virtual Environments, Assistive Technologies, Smart Integrated Systems – Sensors, Communication, Platforms, Mobile Networks and it spans across many disciplines such as Mobility, Environmental Studies, Logistics and Supply Chain, Citizen Science, Cybersecurity, Culture and Resilience to address questions of global significance and local relevance. In the above areas, I-SENSE responds to present-day needs, opens up new networks for action, builds synergies and works together with industry to offer a world-class research environment for critical inquiry and scholarly exchange.</p> <p>With more than 100 highly qualified researchers and having a long history of involvement in EU funded and National research projects – more than 150 completed projects-, our research team produces outstanding research results that contribute to the targets of the European Research Area (ERA). A strong network comprising of more than 300 international partners, valuable players in the research, policy and industry arena offers our team a nourishing environment for continuous growth and support. Technical expertise and knowledge accumulated over the years has often been translated into innovative results.</p>	

	<p style="text-align: center;">David Ciprés Research Line Leader</p> <p style="text-align: center;">IoT, Blockchain and Data Analytics applied to industrial and logistic processes in ITAINNOVA</p>		<p>https://www.itainnova.es</p>
<p>Dr. David Ciprés holds a PhD in Industrial Engineering from the University of Zaragoza. His thesis deals with the integration of virtual simulation models and optimization engines for process improvement, with a digital twin approach. He has been working at the Aragon Institute of Technology (ITAINNOVA) for more than 20 years on projects related to the application of virtual simulation models in industrial and logistic processes. Currently he is responsible for the Research Line of IoT, Blockchain and Data Analytics applied to industrial and logistic processes. His main research interests are simulation (digital twin), modelling and optimization of logistics processes, supply chain management, warehouse operations management and demand forecasting. David has participated in many national and European logistics R&D projects throughout his career since 2000 in automotive, manufacturing, transportation, and retail companies. He is also associate professor in the Department of Business Management and Organisation of the University of Zaragoza. He teaches courses related to digital twinning at ZLC (Zaragoza Logistics Center) and CEL (Centro Español de Logística). He is also coordinator of the group of digitisation and automation of logistics processes in LOGISTOP association, where he leads the working group of digital twins of this association.</p>		<p>ITAINNOVA is the Aragon Institute of Technology, a non-profit center linked to the Department of Science, University and the Knowledge Society of the regional government of Aragon. The mission of ITAINNOVA is to support companies through technological research and innovation, helping them increase their competitiveness by developing new products and improving their processes, and by fostering the smart use of technology in regional, national and international contexts.</p> <p>We offer a multidisciplinary approach that can help tackle the many technological challenges our society faces, with a very effective cross-sector approach, working on a wide variety of industrial sectors, such as mobility, machinery, automotive, construction, aeronautics, railways, logistics, ICT, health, robotics, agro-industry and materials transformation.</p>	

	<p>Michael Archer Strategy Development Director</p>	 A Brambles Company	<p>https://www.chep.com/au/en/why-chep</p>
<p>Michael has worked for CHEP for 30 years, many of those working with grocery retailers and manufacturers to optimise the share and re-use business model for reusable packaging, and extend the pallet pool from 6 European countries in 1990 to 28 today.</p> <p>In 1999-2001 he was an active member of the Profit Impact of ECR Taskforce for ECR Europe alongside leaders from major retailers and manufacturers.</p> <p>Today his focus within CHEP is on collaboration to identify opportunities to reduce transport, packaging and broader supply chain waste and to lead them through research, development, testing with a clear focus on maximising impact as successful initiatives are scaled up.</p>		<p>CHEP operates pools of standard reusable packaging assets across Europe. To Service this it delivers and collects empty packaging from c300,000 locations across Europe, working with all the grocery retailers and many of their suppliers every day. It is best known for its blue pallets, shared widely across Europe and beyond.</p> <p>As a leader in the Circular Economy, Brambles (CHEP's parent company) is recognised as one of the most sustainable companies in the World. Brambles launched their Zero Waste World initiative in 2019, committed to supporting customers and interested parties in step-change reductions in packaging, transport and process Waste.</p> <p>CHEP has initiated and scaled up a programme of collaborating with customers to minimise empty running, initially surrounding the shipping of empty pallets, and subsequently as an orchestrator of multiple customers collaborating to use the same vehicle for complementary lanes. CHEP is looking to use its experience, scale and visibility over its customers' transport lanes to support the focus on decarbonising logistics.</p>	

	<p style="text-align: center;">Bas van Bree Program Manager</p>	 <p style="text-align: right;">www.dialog.nl</p>	
<p>Bas is a program manager for the Dutch Top sector of Logistics and TKI Dialog. He is responsible for innovation driven development of the program lines Cross Chain Control Centers and Supply Chains, specifically initiating innovation and collaboration within and between supply chains. This tasks largely consists of project development in cooperation with stakeholders from government, business and knowledge institutes.</p> <p>Bas is working for TKI Dialog since October 2014 and before that he has built up over 10 years of experience in the logistics sector at Buck Consultants International. In his time at Buck Consultants International he has carried out over 100 projects in the field of transport, logistics and supply chain management. His experience ranges from the development of port and terminal infrastructure to the implementation of control tower operations at logistic service providers. He has also carried out projects in an international context, amongst others in FP7 and H2020 programs and in Ethiopia, Peru, United States and Colombia.</p> <p>At TKI Dialog he is responsible for the development and execution of one of the research and innovation roadmaps for the Top sector of Logistics and TKI Dialog. In his role he establishes public private partnerships which are able to address and solve specific challenges based on advanced forms of supply chain collaboration. Projects within his roadmap vary from development of advanced analytics tools to operational supply chain collaboration projects.</p> <p>Bas is also a current vice-chair of the Global Supply Network Coordination and Collaboration theme within the European ETP-logistics ALICE.</p>		<p>TKI Dialog is the Knowledge and Innovation Partnership in which business, knowledge institutes and government work together in the innovation program of the Dutch Top sector Logistics. TKI Dialog support public private partnerships in research and development by matchmaking of partners, support in the development of collaboration consortia, strategic planning of innovation topics, and the preparation of research programs. The program management monitors innovation projects in terms of knowledge development and governance, as to account for the government investments in R&D in a transparent and open way.</p> <p>Furthermore, TKI Dialog is actively involved in knowledge transfer and valorization. These activities consist of a contact point for SMEs, general communication and networking, support in valorization of R&D project results and participation in events. In those themes relevant for a strong and competitive logistics sector; sustainable logistics, data-driven logistics and supply chain coordination. In the Netherlands and beyond.</p> <p>In addition to the roadmaps, we are dedicated to the internationalization of Dutch innovation in the logistics sector. We do this through the Platform for Foreign Promotion, the European ETP-logistics ALICE, and other bi-lateral cooperation</p>	

	<p>Dr. Jan Tore Pedersen, Owner and CEO</p>		<p>Marlo.no</p>
<p>Dr.ing Jan Tore Pedersen is Managing Director of Marlo a.s. He holds an MSc in Control engineering and a PhD in manufacturing from the Norwegian University of Science and Technology (NTNU) and an MSc in Computer Science from University of California at Santa Barbara.</p> <p>Since the early 1990-ies, Dr Pedersen has been active in EU and national projects for development of innovative logistics solutions and related information technologies. Noticeable projects are e-Freight (DG MOVE) and iCargo (DG CONNECT).</p> <p>Since 2012, Marlo collaborated with 3M, DHL and Gebrüder Weiss to develop the Software-as-a-Service solution MixMoveMatch – aimed to ensure that transportation resources are utilised to their maximum capacity. In 2017, this development led to forming the company MIXMOVE, which is now further commercialising the MIXMOVE Solutions.</p> <p>Dr. Pedersen is a working board member in MIXMOVE and holds the role as an R&D Manager in MIXMOVE.</p> <p>Before founding Marlo, his experience includes business and technology development of advanced software systems (The Kongsberg Group), and business- and technology development in the maritime sector (The Kvaerner Group), including an integrated system for ships covering all on-board control and navigation capabilities.</p> <p>From 1995 to 1998, Dr Pedersen held a part-time position as professor at the Technical University of Norway in the field of mechatronics. From October 2009 until September 2011, he was an adjunct professor in logistics at the BI Norwegian Business School.</p>		<p>Marlo is a small, Norwegian consultancy company that has been involved in EU funded research and development since its establishment in 2006. The company and its staff have been involved in more than 35 EU-funded projects in transport and logistics. Most projects have been dedicated to management systems and information exchange. However, some of the projects have been focused on designing ships and maritime cargo handling solutions.</p> <p>The company has been aiming to commercialise the results of EU-funded projects. The latest example is the development of the logistics management solutions that resulted in setting up the company MIXMOVE in 2017. On the way to transferring all IPRs etc. to MIXMOVE, Marlo received the Innovation Radar Innovation Price in 2016 and the Physical Internet Venture Award in 2017.</p>	

	<p>Serge Schamschula</p> <p>Senior Project Manager</p>	<p>TRANSPOREON Delivering connections</p>	<p>www.transporeon.com</p>
<p>Born in 1963 in Austria</p> <p>Studied Business Administration and National Economics at the University of Linz.</p> <p>1987 Master of Business Administration.</p> <p>1987-2000 Several positions in sales, marketing and also general management.</p> <p>2000-2010 Independent business consultant with focus in logistics since 2002 (introduction of intermodal traffic, key-account management in logistics, etc.).</p> <p>2010-2018 Head of Sales and Key Account Management at Transped Europe (forwarder).</p> <p>2019-today Member of the Board at the "European Freight & Logistics Leaders Forum".</p> <p>2018-2020 Strategic Marketing at Transped Holding.</p> <p>2020-today Senior Partner Manager at Transporeon.</p>		<p>Transporeon is a cloud-based provider of SaaS for logistics. Its transportation sourcing and management platforms enable the most experienced network of shippers, suppliers, retailers, goods recipients and carriers in the world. With its cloud-based logistics planning software and transportation management software, Transporeon gives unmatched opportunities to reduce the number of empty trucks, improve transparency, cut waiting times and enable efficient, digital end to-end processes.</p> <p>Transporeon aims to put the shipper in total control of transportation sourcing and management challenges, and aims at making collaboration as easy as possible. Through improved collaboration, Transporeon supports our environment by reducing CO2 consumption in particular.</p> <p>The Transporeon group offers several complementary services such as market intelligence or freight payment audit, for example.</p>	

	<p>Jannicke Baalsrud Hauge Research Scientist, Head of BIBA GamingLab</p>		<p>www.biba.uni-bremen.de</p>
<p><i>Jannicke Baalsrud Hauge (female, Dr.-Ing) works part-time as a research scientist & head of BIBAGamingLab. She is associate professor in production Logistics and holds a Ph.D. in Engineering from the University of Bremen. From 2001 to 2003 worked as a research scientist at the University of Bremen, responsible for the functional architecture of e-commerce software. In 2003 she joined BIBA (Bremer institute für Produktion und Logistik). Since 2015 she is also working at KTH. For BIBA, she is currently mainly leading and managing projects on GBL in Production and Logistics at national and EU level. As a part of her job for BIBA, she also teaches two master courses at the University of Bremen, as well as supervising student works at all three levels in the field of SG application development, re-engineering, decision-making, and supply chain risk management. Her main topics are developing SG and simulation applications, development of GBL concepts, Requirements engineering (IT solutions for logistics, CPS, and SG), process analysis, and business modelling. Jannicke is a member of several boards, chairing the working group IFIP 14.8, IFIP 5.7- SIG on serious games, member of the Swedish Logistics Cluster, and board member of Serious Game Society. She is member of the advisory board for the vocational education on logistics at the college of Södertälje and in the international symposium of Logistics. She has authored 300+ papers. She has several years of experience as a dissemination, exploitation, and risk manager in EU projects.</i></p>		<p>Bremer Institut für Produktion und Logistik GmbH (BIBA) has 120 employees, 100 research scientists, PhD-students, and administrative staff. The institute is directly linked to the University of Bremen, Department of Production Engineering, and educates students in mechanical engineering and economics (logistics). The research division "Applied Information and Communication Technology" (IKAP) is a multidisciplinary research entity dealing with ICT application in production and logistics networks and e-learning, production systems, and computer science in different areas and introducing new information technologies production. IKAP designs, develop, and implements methods and tools to support inter-organizational company networks. The national and European research projects BIBA has been involved in have dealt with ICT and transport: (1) trial about direct techno-economic evaluation for companies and comparison and analysis of impacts of different communication scenarios, (2) system about dynamic networked organisation on heterogeneous networks, (3) verification and validation of enhanced digital short-range radio applications, (4) development of an exchange service for communication in harbour areas, (5) training engineers for mastering new requirements in globally distributed manufacturing by the use of ICT, (6) information transfer in business process development, (7) development and testing of computer-based training materials in logistics with the use of the internet, (8) socio-economic analysis and macro-modelling of adapting to information technologies in Europe, (9) e-mobile testbed for interoperability of networks ine-logistics (10) network of regional maritime competence centres, (11) regional strategies for the logistic Integration of shipping in Europe, (12) integrated solutions for intermodal transport within the EU. www.biba.uni-bremen.de. BIBA is part of the Mittelstand 4.0-Kompetenzzentrum Bremen, which brings together numerous competencies from the entire region and makes them available to SMEs in a bundled form. In digitalization, the Competence Center supports companies to first identify the individual challenges and then find the optimal solutions. The focus of the Mittelstand 4.0-Kompetenzzentrum Bremen is on small and medium-sized enterprises (SME). Although many inquiries come from regional economic focal points such as wind energy, automotive, food and beverages, logistics or marine technology, there are no restrictions in terms of sectors. The Competence Centre offers a range of free support services to interested parties. The entire innovation process is covered: from information about the potential of digitalization over the opportunity to experience relevant applications in practice and prepare employees for the digital world through qualifications up to support during digitalization measures. Mittelstand 4.0-Kompetenzzentrum Bremen is part of the Initiative Mittelstand-Digital of the Federal Ministry of Economics and Energy (www.mittelstand-digital.de) is kept within the framework of the funding initiative Mittelstand 4.</p>	

	<p>Charlotte MIGNE Group Sustainable Development Director</p>		<p>www.fmlogistic.com</p>
<p>Charlotte started her career in Sustainable Development within the Accor Group between 2004 and 2006. She then joined the consulting firm Capgemini Consulting where she carried out several organizational and strategic missions for major transport and energy companies.</p>		<p>Founded in 1967, FM Logistic is a major global player in supply chain with expertise spanning warehousing, transport and co-packing. The independent, family-owned group is a leader in the FMCG, retail, perfume & beauty, manufacturing and health sectors.</p>	
<p>In 2010, she joined the Edenred Group (formerly Accor Services), a global leader in prepaid service vouchers, as Corporate Social Responsibility Director and then, as from 2014, Corporate Social Responsibility and HR Director. During this period, she was in charge of the FOOD programme (Fighting Obesity through Offer and Demand), European consortium composed of private public partners, co-financed by the European Union.</p>		<p>With operations in 14 countries across 5 regions (Western Europe, Central Europe, Eastern Europe, Asia and Latin America), FM Logistic generates a turnover of more than €1 billion, 63% of which come from outside France. A socially responsible Group, FM Logistic uses innovative methods to manage its 26,200-strong workforce.</p>	
<p>Since 2017, she was appointed Group Sustainable Development Director at FM Logistic. Her mission is to define and animate ambitions, priorities and objectives regarding sustainability, answering the needs of different stakeholders. 3 main stakes are included in FM Logistic sustainable roadmap: people's working conditions, safety and personal development; environmental impacts of FM Logistic activities on the whole value chain and the development of sustainable offers towards our clients, including urban logistics.</p>		<p>FM Logistic pioneers tomorrow's supply chain solutions. It is behind concepts such as pooling (joint management of transport and logistics resources) and collaborative routing centres (multi-customer, multi-supplier pooled flows). The Group also works with manufacturers to devise ground-breaking solutions that will shape the warehouse of the future—such as AGVs, drones, robots and big data—and supports incubator-hosted startups harnessing sharing economy concepts for warehousing and transport applications.</p>	
		<p>FM Logistic keeps its finger on the pulse as consumer habits change. It has developed Citylogin, a cost-effective last-mile logistics solution that is currently in use in cities such as Rome, Paris, Madrid and Moscow.</p>	
		<p>To mark its 50th anniversary, FM Logistic launched the FM Foundation to support and co-develop social innovation projects that help children and unemployed people living close to its current and future premises.</p>	

Paola Cossu
Chief Executive Officer

www.fitconsulting.it

CEO and shareholder of FIT Consulting srl. Degree in Statistics. In the Company, she is also the head of EU Research and Innovation. During her 25 years of experience, she wrote, managed and coordinated several EU projects on transport & logistics. Her qualified skills are related to E-commerce & Urban logistics, Smart-Shared Mobility and Mobility as a Service, Physical Internet and collaborative logistics, Curbside Management, Parking solutions, and Supply Chain Management. Her horizontal skills are related to overall project coordination, development of business model and transferability, impact assessment / appraisal, governance and policy models, identification of user requirements (with KPIs), fund raising/ financing schemes and change management. She is currently the overall Project Manager of the EU Service Contract "**New mobility patterns for European cities**" (ongoing). Former project coordinator of: SOCIALCAR "An urban, smart, social and green mobility approach to carpooling" (H2020), **C-LIEGE** "Clean Last mile transport and logistics management for smart and Efficient local Governments in Europe" (STEER-2011), **CONCERTOUR** "Concerted innovative Approaches, Strategies, Solutions and services improving mobility and European tourism" (7FP) and **MOSCA** "Decision Support System For Integrated Door-To-Door Delivery: Planning and Control in Logistic Chains (5FP). Project director for: **BOOSTLOG** (H2020) "Boosting the impact of freight transport and logistics EU funded research", **GECKO** (H2020) regulatory schemes to implement disruptive technologies and business models in transport, **SENSE** (H2020) Accelerate the path towards the Physical Internet, **I-MOVE** (H2020) "Unlocking large scale access to Combined Mobility through a European MaaS Network", **EBSF2** (H2020) "European Bus System of the Future", **3ibS** "Intelligent, Innovative, Integrated Bus Systems" (for UITP); **CITYMOVE** "City multi-Role Optimized Vehicle"(FP7); **CIVITAS RENAISSANCE** (FP7), **NODES** "New Tools for Design and Operation of Urban Transport Interchanges", **C-DISPATCH** "Clean-Distribution of goods in SPecimen Areas at the last mile of the intermodal Transport CHain" (LIFE+), **IMPROVERAIL** (5FP); **ITSWAP** (5FP); **STIMULUS** (4FP) "Segmentation for Transport In Market Using Latent Users psychological Structures", **PLATFORM** "Computer Controlled Freight Platform for a time-table rail transport system" (4FP); **EQUIP** (4FP). Involved in several studies on urban logistics in Italy, such as Ferrara, Padova, Prato, Frosinone. Consultant for Taranto Port Authority in the MEDNET project (Interreg). Consultant for FINEST in EASYCONNECTING project (Interreg). Current **Vice-chair of the Urban Logistics TG in "ALICE"**. Invited professor for LUISS Business School (Master in Eco-Mobility Management) and Link University (Master in Sustainable Transport / Mobility)

FIT Consulting srl (FIT) is an Italian independent SME, founded in 1997. Dynamic and professional, over time FIT managed to build a network of over 300 partners in Europe, Asia and the USA, becoming members of the main European thematic networks in mobility of people and goods. Its expertise is based on more than twenty years of experience in fund-raising and technical and scientific assistance for the development of innovative projects and services in the field of expertise. FIT is quality certified UNI-EN ISO 9001-2015 for "Design and delivery of innovation and research projects in the field of sustainable mobility of people and goods, design and delivery of consulting services for funding programs in the field of sustainable mobility of people and goods, compliance with regulations, laws, national and/or international". As mission, FIT acts a mobility system facilitator inviting the civil society, central and local government, industry and the academic sector to join forces to generate a real change in way of living and moving, having always in mind that governance in mobility has to be oriented to support public interest and societal challenges. With its 3 Departments, Energy transition, Digital transformation and Social Innovation/Next Normal, FIT built up a remarkable R&I international experience in sustainable mobility of people and goods. FIT earned a solid and trustworthy reputation in supporting, also during Covid19 pandemic crisis, both public and private clients and partners, with value-added services and take up actions at every stage of project development: feasibility, conflict resolution / participation/motivation/dialogue / cooperation models (e.g. Quality Partnerships), business cases and economic/financial/social viability, evaluation of impacts, full project development and market uptake - defining adequate conditions for transferability to similar cases. FIT is able to define new governance models when implementing innovative goods and people mobility services/measures, especially when related to emerging economic disruptive trends (e.g. e-commerce, automation, sharing and circular economies) and enabling technologies (e.g. AI, Digital Twins, IoT), to increase potentials for success of kind of measure (or mix of them) for balanced regulatory framework, incentivising EU market competition. FIT participated both as coordinator and partner in several projects funded in different Programmes of the European Commission (e.g. former EC Framework Programmes from 4th to 7th, HORIZON 2020, LIFE +, Shift 2 Rail, CIVITAS, JTI-FCH) and provides technical assistance to local authorities in Cooperation projects (I-LOG - Interreg IIIB; PUMAS - Alpine Space; EASYCONNECTING - IPA Adriatic; SOLEZ - Central Europe Programme; MEDNET - MED Programme; RAIL4SEE - South East Europe Programme; MED Atlantic Ecobonus - CEF 2014-20 programme; SULPITER - Central Europe Programme; DEMO-EC Interreg Europe; ADRIPASS - Interreg Adrion; NEW BRAIN - Interreg Adrion; CARICA - IPA Adriatic-Ionian, ICARUS - Interreg V-A Italia - Croazia CBC Programme, FRAMESPORT Interreg V-A 2014-2020 Italy-Croatia CBC Programme)

	<p style="text-align: center;">Hans Schurmans</p> <p style="text-align: center;">Director Logistic Operation and member of the Proximus leadership team</p>		<p>www.proximus.com</p>
<p>Hans Schurmans is the logistics operations Director at Proximus Group, the major telecom and digital service provider in Belgium. He has extensive experience in operational execution in a multisite retail environment and led major innovation and transformation programs within the group. Transforming classic logistic operations into a logistic customer experience added value service provider. Previously, Hans held management positions in multiple domains such as IT, purchase, commercial and project management. His focus besides operations is digital transformation, change management and people development.</p>		<p>Belgium's leader in quality and service with the full choice of features – bringing customers instantly close to what matters.</p> <p>Proximus' ambition is to become a digital service provider, connecting everyone and everything so people live better and work smarter. Through our best-quality integrated fixed and mobile networks, we provide access anywhere and anytime to digital services and easy-to-use solutions, as well as to a broad offering of multimedia content. Proximus transforms technologies like the Internet of Things (IoT), Big Data, Cloud and Security into solutions with positive impact on people and society</p>	

	<p>Magnus Blinge Research Manager</p>		<p>https://www.scania.com/</p>
<p>Magnus BLINGE has since November 2018 worked as Research Manager for the area Future Transport Systems with a focus on Urban Logistics at Scania CV AB. He also holds a position as Adjunct Professor in Sustainable Logistics at The Division of Logistics and Quality Management at Linköping University, Sweden.</p> <p>From 2016 – 2018 Magnus worked as senior project manager at Lindholmen Science park, a platform for research cooperation. He helped to identify and articulate different stakeholders needs and from that forming project proposals and applying for research funds.</p> <p>He worked 2010 – 2016 at Chalmers University of technology as senior lecturer at the Division of Service Management and Logistics and also as Co-Director for Chalmers Area of advance. The areas of advance represent a field of strength at Chalmers on all 3 sides of the knowledge triangle; research, education and innovation, crossing scientific borders that impede progress. He also had a position as head of department from 2014 – 2016.</p> <p>2007 - 2010, Magnus worked at VINNOVA – Swedish Governmental Agency for Innovation as Head of the Transport Department and responsible for Vinnova’s work with strengthening the Swedish innovation system for the transport sector. The Transport Department was responsible for the development of national and joint international R&D-programs in the whole field of transport research with a budget of approx. SEK 130 million. I was responsible for the contacts with the Ministry of Enterprise in Transport related issues and supported the officers at the Ministry with memos and decision basis before international negotiations.</p> <p>Magnus was Branch Manager at TFK – Transport Research Institute from 1998 to 2005, responsible for developing the business area Environmental Logistics and head of TFKs Gothenburg office of 4-6 employees. During this period he also worked as project manager for several national and EU-projects in the field of Logistics and Environment.</p>		<p>Scania is a world-leading provider of transport solutions. Together with our partners and customers we are driving the shift towards a sustainable transport system.</p> <p>In 2019, we delivered 91,700 trucks, 7,800 buses as well as 10,200 industrial and marine engines to our customers. Net sales totalled to over SEK 152 billion, of which about 20 percent were services-related. Founded in 1891, Scania now operates in more than 100 countries and employs some 51,000 people. Research and development are concentrated in Sweden, with branches in Brazil and India. Production takes place in Europe, Latin America and Asia, with regional production centres in Africa, Asia and Eurasia. Scania is part of TRATON SE.</p>	

ALICE Members

ALICE membership is bringing an holistic approach → All key logistics stakeholders represented!

Fernando Liesa

Alice Secretary General

Dr. Fernando Liesa is Secretary General at ALICE, Alliance for Logistics Innovation through Collaboration in Europe, The European Technology Platform on Logistics recognized as such by the European Commission in 2013. ALICE is setting up the vision for future logistics and supply management and the research and innovation agenda and roadmaps to progress towards the concept of the Physical Internet.

Fernando holds a PhD by University of Zaragoza (Spain) since 2004. Fernando has worked in the field of knowledge transfer and research management linked to chemical engineering, process industries, manufacturing and lately (+10 years) to logistics and supply chain management. Fernando worked in Zaragoza Logistics Center (one of the MIT Global Scale Network Centers) from 2006 to 2014 as Knowledge Transfer Director; from 2007 to 2014 he acted as General Manager of the Spanish Center of Competence in Logistics, CNC-LOGISTICA and the Spanish Technology Platform on Logistics, Logistop. Fernando worked for ENIDE, Small Consulting and technology enterprise in the field of personal mobility and logistics, from 2014 to 2016.

Dr. Liesa has coordinated and participated in several national and European Research and Innovation projects. Fernando Liesa led the creation of the European Technology Platform in Logistics, ALICE. Fernando cooperated with European Intermodal Research Advisory Council in the definition of the Intermodal Strategic Agenda 2010-2030+, and with European Road Transport Research Advisory Council (ERTRAC) in the definition of the Research and Innovation Roadmap: Sustainable Freight System for Europe: Green, Safe and Efficient Corridors (2011). Fernando is appointed member of the Digital Transport and Logistics Forum launched in 2015 by European Commission (DGMOVE).

Dirk 't Hooft

Director Strategy, Finance and Administration

Graduated in Economics at the University of Rotterdam in 1973, from 1973-1991 held different Management positions in the publishing industry and Agricultural Machinery, from 1991-1997: CEO President of HES Beheer, Rotterdam, holding of terminal handling activities in ports of Rotterdam, Amsterdam, UK, Thailand. From 1997-2002: CEO of Flower Auction Aalsmeer NL From 2002-2013: CEO and President of NDL/HIDC also responsible for research and innovation. From 2008-2011 acting as Innovation Manager of EIRAC (European Intermodal Research Advisory Council). From 2011-2014 coordinator of the CO3 FP7 project on Horizontal Collaboration and Co-founder of CO-Tree.

I am enthusiastic and convinced of the effect of collaboration and coordination on efficiency and sustainability in the supply chain. Dirk 't Hooft is an independent Senior Advisor. At European level, he is active in research and innovation projects and member of the Secretariat and currently Chair of ALICE WG 4 on Supply Networks Coordination and Collaboration. Dirk works also part-time as Senior Advisor Logistics Collaboration for Argusi b.v. and is involved with Argusi in the new H2020 project CLUSTERS 2.0.

Dirk is also Chairman of the Dutch Network on reducing Postharvest Food losses in developing countries.

Dirk is experienced in the management of innovation projects, is able to match people and organizations, and has a broad international experience.

Yanying Li

Head of Programmes and Knowledge Management
TG5 Programme Coordinator

Dr. Yanying Li is an experienced advocacy professional, project leader and consensus builder with more than 10 years' experience in engaging with international stakeholders, EU policy analysis and advocacy, strategy development, project management and fundraising.

Yanying holds a PhD in Transportation Engineering from the University of Southampton, UK, and a Master degree in Civil Engineering from Tsinghua University, China. She worked as Liaison officer at the secretariat of Global Covenant of Mayors for Climate and Energy (GCoM), funded and co-chaired by Mike Bloomberg, where she was responsible for liaison with UN Agencies, EU institutions, city networks, and NGOs to advance cities' climate action. From 2008 to 2017 she worked as Senior Manager at ERTICO - ITS Europe, where she led several EC-funded international cooperation projects working with cities from Europe, East Asia, the Middle East, and Latin America on implementation of sustainable urban mobility and logistics policies and technologies. Prior to joining ERTICO, she worked as Research Fellow at the University of Southampton.

Yanying has a large number of publications including a book chapter 'The Role of Public Authorities in the Development of Mobility-as-a-Service' in "The Governance of Smart Transportation Systems", published by Springer.

Indrek ILVES

TG3 Programme Coordinator

Indrek Ilves is an independent logistics innovation consultant who has been actively involved in the field of sustainable logistics. He has experience in project management, supply chain management with the focus on digital-enabled supply chain capabilities and emission calculations in the transport sector. In the past, Indrek has been part of several FP7 project teams such as SUPERGREEN, SPECTRUM, CAPIRE, CO3 and Horizon 2020 project WINN. After his graduation in the field of transport engineering (MSc) at the Tallinn Technical University, he has worked for the Ministry of Economic Affairs and Communications of Estonia, Supply Network Innovation Centre in Procter & Gamble and consulting and research services company Interlogistics. Since 2014 he is a member of the secretariat of the European Technology Platform ALICE - Alliance for Logistics Innovation through Collaboration in Europe, where his role is to support general management of the organisation.

Tomas Ambra
Program Manager and Technical Lead

Dr. Tomas Ambra is a Program Manager and ALICE Technical Lead. He facilitates the work in TG2 on “Corridors, Hubs and Synchronomodality” and TG3 on “Information Systems for Interconnected Logistics”. Furthermore, he is involved (directly and indirectly) in multiple projects such as Fenix, Pioneers, Seamless, MultiReload, Cristal etc. representing ALICE.

Before joining ALICE, Tomas worked as Domain Lead for Freight transport & Logistics at imec, Senior research scientist at MOBI-VUB an visiting professor at Hasselt university. He was also the Chairman and vice-chairman of TG2 (2019-2022). Tomas has focused on transversal topics that concern data governance, business modelling, simulation modelling, data and AI as well as policies and initiatives that bring relevant technological solutions closer to reality and end-users. His interests further touch upon data spaces, ICT and digital twins. Tomas has authored, co-authored and/or contributed to various national and international projects such as cSBO Dispatch, cSBO PILL, H2020 CityLab, H2020 Pioneers, HE ReNew, H2020 5G Blueprint and cSBO Sytadel.

He holds a PhD degree in business engineering from the Vrije Universiteit Brussel, and a master’s degree in Geographic Information Systems from KU Leuven. From a fundamental point of view, he has combined features of multi-agent systems, discrete event simulations and geographic information systems. In 2018, he was honoured by receiving the 1st prize for cross-modality from the European Commissioner for Transport and DG for Research and Innovation.

Tomas has a number of journal publications, and also a book chapter on “Intermodal and Synchronomodality Freight Transport” published in the Encyclopaedia of Transport by Elsevier.

Elvina Nowak
Project manager

Graduated from KEDGE BS in Master in Science of International Business, I had the opportunity to discover all aspects of businesses with a real interest for logistics and supply-chain. After several experiences in marketing, communication and business development, I joined Euralogistic in 2016 as EU projects and partnerships officer, a role which I assumed for 2 years and half. During this period, I had the great opportunity to manage the massification project (collaboration methodology among shippers) in the frame of the H2020 Clusters 2.0 project as a task leader. In parallel, I was also active in Alice as the European logistics clusters referent inside the Mirror Group and also in different working groups. On July 2019, I worked as an external consultant for the Clusters 2.0 project for leading a work package dedicated to multimodal freight transport and its digitalization with P&G until May 2020. On September 2020, I came back in Euralogistic as international project manager for the development of the "International campus of green logistics and supply chain" and on the international promotion of Euralogistic. Throughout these multiple experiences in logistics and supply chain, I get a better picture of logistics challenges and issues. Regarding my experience in multimodal freight transport and collaboration in supply chains, I joined the TG4 as vice-chair. After those several experiences, I am fully aware of the urgent need to change the logistics paradigm towards a more sustainable system through collaboration and digitalization.

Now, as project manager in the strong community of Alice, I will take the lead of different EU projects with a focus on the modal shift and collaboration. I will also coordinate the TG4 for supporting activities and fostering cross-fertilization with other TGs.

Andrea Annunziata
Project Support & Knowledge Manager

Andrea Annunziata works as a Project Support & Knowledge Manager for the Collaboration Programmes and Communication area of ALICE. Before joining ALICE, he has worked for NGOs, EU institutions, and even gravitated in the private sector. He is a dynamic professional with prior experience in project coordination and an appetite for EU policies on Transport, Sustainability, Research & Innovation.

Andrea holds a BA in International Relations and an MA in Political Science from the University of La Sapienza (Italy), further studies in International and *Haute Formation* in European Programmes and Projects. Having volunteered for years in Italy and Africa, he is naturally prone toward Humanitarian Aid, International Cooperation and child poverty.

When not working, he enjoys trying new sports, explore the world and horse-riding.

Originally from Italy, Andrea speaks English, French and Spanish.

Pablo Segura

Project Support & Knowledge Manager

Pablo Segura is Project Support and Knowledge Manager at ALICE.

Pablo completed a Bachelor's degree in Industrial Technologies Engineering at the University of Zaragoza in 2020 by presenting his final project "Analysis of the technical and operational capacity of a combined semi-trailer rail transport service between the port of Algeciras and Zaragoza".

Studying a Master's in Direction and Management of freight transport at the University of Zaragoza was the next logical step as Pablo's interests in transport and logistics grew. While studying he worked as a research collaborator on a DUOTRAILER/EMS project.

In 2021 he completed his Master's by presenting his final project "Definition, deployment, measurement and associated action plan of transport planning indicators".

Since 2022 Pablo has been working for "ALICE" as Project Support and Knowledge Manager, providing support to the first three Thematic Groups and managing the webpage and Knowledge Platform.

Mar Vicente

Alice Secretariat Support

Mar Vicente is Research Office Assistant at Zaragoza Logistics Center giving general support to the Research Office and since September 2018 gives support to the ALICE Secretariat. Prior to that, she acquired very large professional experience in different SMEs with national and international profiles. She obtained her Vocational Education and Training in Business Administration on 2007 and obtained a strong experience carrying out different management activities.

She has developed her career at ZLC since 2008, and supported the Spanish Technology Platform in Logistics, Intermodality and Mobility, LOGISTOP, managing the Administrative Secretariat. In addition, she supported ALICE Secretariat from 2011 till 2015, first during WINN European project execution period, and later on after the Platform was officially launched in 2013. She also acted as Secretariat at the National Competence Center in Logistics – CNC LOGISTICA.
