

Call for Actions

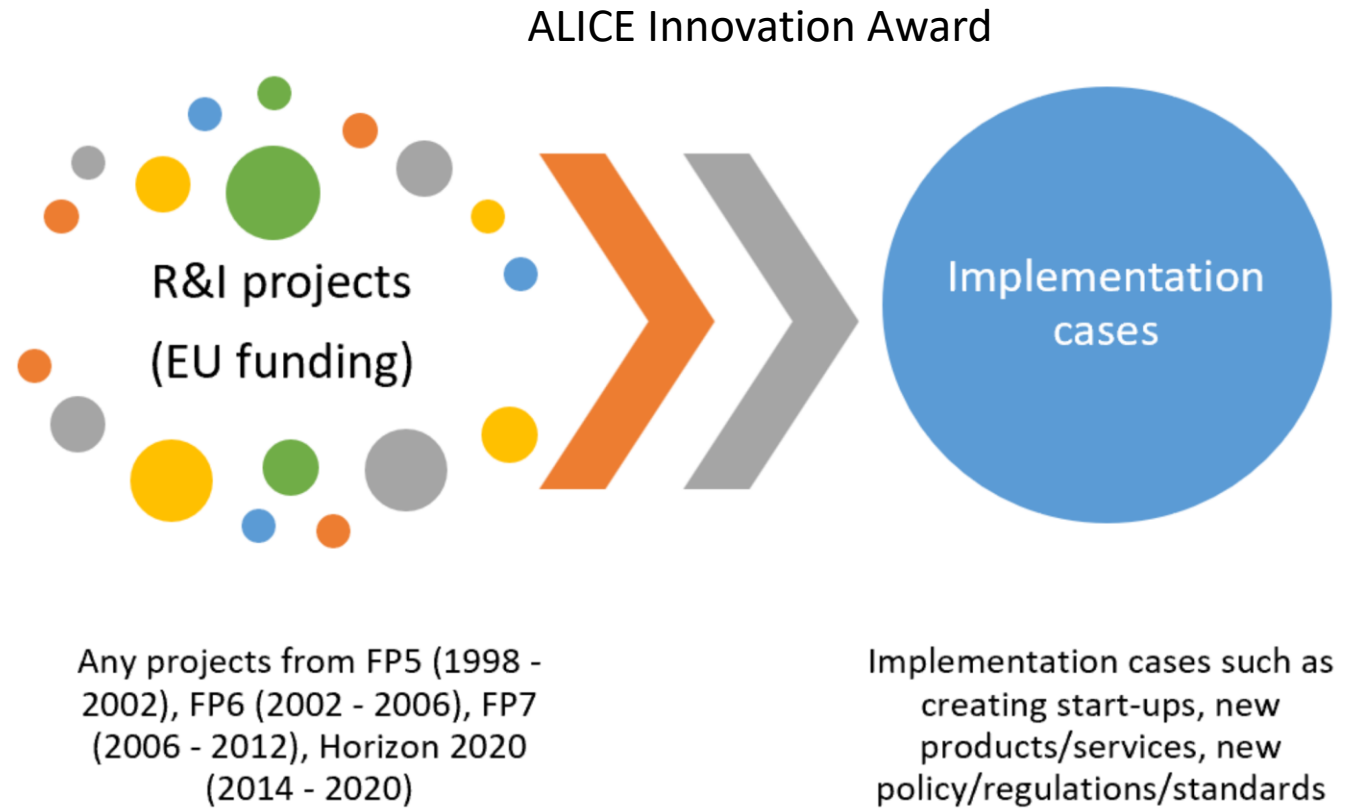

to support uptakes of
Horizon 2020 and Horizon
Europe projects' results in
the transport sector

Yanying Li, ALICE

on behalf of the Task Force on
Accelerating Innovation Uptake for
Sustainable Transport

We found very few implementation cases - few R&I projects' results have been implemented & expected impacts have been delivered.

It is time to change the discourse to systemic transformation for R&I projects that will deliver their expected impacts

- ✓ Lack of implementation & impacts has been recognised.
- ✓ EC has taken actions.

What went wrong?

- Lack of ambition -> winning proposals & completing projects are priorities
- Lack of involvement of end users of project results in project activities
- Lack of capacity & knowledge to know how -> experienced project managers can write good proposals but not implement project results
- Lack of engagement of business and industry experts
- Lack of financial instrument to support uptake

Let's take actions!

Ambition

- To collect and showcase successful uptake of past EU funded R&I projects, aiming to raising awareness and giving project beneficiaries

Capacity

- To develop guidelines and provide training and capacity building to project beneficiaries to help them design proposals, implement projects and further exploitation

Let's take actions!

Before
project

Require information on experiences in
exploitation of previous

Include business and marketing expert

Include end users of project results

Industry expert for proposal
evaluation

We call for continuing simplification of proposal preparation and project
management

Let's take actions!

During
project

Guidance on exploitation and continuously assess implementation efforts

To look for and disseminate funding and investment opportunities

We advocate for synchronisation of funding opportunities

Let's take actions!

After
project

Monitor exploitation results of previous projects and impacts

We call for industry associations, research membership organisations and city/region networks to evaluate short and long-term impacts of R&I projects

We call for cooperation with regional and national funding schemes to support capitalisation of project results at local level

Let's take actions – welcome our panellists

Pedro Homem de Gouveia

Senior Policy and Project
Manager at POLIS

David STORER

Director of Research,
Innovation and New Mobility
at CLEPA

Stefan Deix

Director of EUCAR;
Innovation Expert

Nik Delmeire

Coordinator at European
Inland Waterway Transport
Platform - IWT

- ✓ What are current practices of your organisation to advance implementation of R&I project results?
- ✓ What should be done in your view to boost impacts of R&I projects?
