

Our Vision

We open the call to look for concrete examples in which R&I projects' results have been further developed and have been deployed as commercial solutions, have generated a new market or have contributed to new policies or regulations. The 6th call focuses on realising the concept of Physical Internet.

We want to promote implementation cases in order to inspire others to follow successful examples. We also want to understand enabling factors to lead such success.

We are studying 22 projects from FP7 and HORIZON 2020 to analyse their impacts. If you have used outcomes of those projects or any other regional, national or European R&I project beyond our lists, please let us know. If you know any projects that have led successful implementation cases, please reach out as well.

We will form a selection committee to look into all collected cases and present the 6th ALICE Logistics Innovation Award to recognise the achievement in a dedicated event in June 2023.

Call for Submission: Implementation Cases on Realising the Concept of Physical Internet

6th ALICE Logistics Innovation Award

Get Involved:

Submission open: 27 April 2023

Submission deadline: 18 May 2023

To: info@etp-alice.eu

More information: etp-logistics.eu/boostlog

Activities performed is
part of

BOOSTLOG

Received funding from European
Union's Horizon 2020 research
and innovation Programme under
grant No 101006902

We are studying 22 projects funded by FP7 & HORIZON2020. If you have used outcomes of the projects or we miss some projects whose projects have been implemented, please let us know!

Realising Physical Internet

The Physical Internet (PI) is an ambitious concept that transfers principles of data exchange on the Internet to goods transport in the real world, i.e. in the internet world, data finds a way without human intervention and neither the sender nor the recipient know the path data packets take. PI aims optimum use of vehicles, assets and the existing infrastructure through open and shared logistics networks and flexible routing to maximise efficiency and sustainability in transport and logistics.

Implementation Cases

Implementation Cases are concrete examples in which causal links between public R&I funding and technology, organizational or process innovation in a specific logistics area can be established.

Implement Cases are that research results have been further developed and have been deployed as commercial solutions, have generated a new market or have contributed to new policies and will establish causal links between research funding and impact.

Call for Submission: Implementation Cases on Physical Internet
