PIQNERS

Portable Innovation Open Network for Efficiency and Emissions Reduction Solutions

Objectives

Reduce the port's total environmental footprint by introducing Clean Energy production, storage, and supply.

Deploy sustainable port infrastructure beyond energy supply and demand.

Introduce eco-friendly improvements relying on digitalisation and new methods of operation.

Co-define and transfer PIONEERS' demonstrations to fellow ports during the project lifecycle.

Deliver and disseminate a Port Master Plan for the transition towards GHG-neutral shipping and

wider multimodal mobility by 2050.

PIONEERS addresses the challenges faced by European ports to reduce their environmental impact while remaining competitive and offering added value in a sustainable global trade ecosystem. It aims to deliver a Master Plan for the greening of ports to become climate neutral by 2050.

4 Pilot Sites

Challenges

Demonstrating integrated low-emission energy supply and production at ports and supply systems.

Demonstrating sustainability and innovation beyond energy supply and demand at ports.

Demonstrating seamless and highly efficient logistics operations, for integrated sea/river-port-hinterland connections.

Performing pilot activities to showcase the positive environmental effects of digitalisation in ports.

Delivering new tools and optimisation mechanisms for multimodal access, facilitating port access and reducing traffic from/to the city or other nodes.

Assessing non-technological framework which can provide financial/operational incentives and legal certainty for implementing low emission solutions.

Developing multi-actor and promoting new governance arrangements that address the interactions between all port-related stakeholders.

Delivering a Master Plan for the future Green Port.
