

Next Steps:

- The work on the Gap Analysis for Societal Readiness and Business Model Development will continue, integrating your valuable input and validation.
- In the coming months, a workshop with the CCAM Logistics Task Force will be organized, focusing on Business Models, particularly on:
 - TCO (Total Cost of Ownership) calculation for road transport automation.
 - How automation can contribute to viable and scalable models.
- The final findings from both initiatives will be presented in a third and final webinar, where you will have the opportunity to validate the results before they are integrated into the MODI Project deliverables.
- You will also be invited to the final event of the MODI Project and engage with different consortium partners/representatives from the European Commission/CINEA and discuss on the project activities/demonstrations.
